Introduction

DISCLAIMER

This document is intended for use by authorized Nokia service centers only.

"Service Schematics" was created with focus on customer care. The purpose of this document is to provide further technical repair information for Nokia mobile phones on used full service centers. It contains additional information such as, "Component finder". The "Signal overview" page gives a good and fast overview about the most important signals and voltages on board. Taking process time and improving the repair quality is the aim of this document. It is to be used additionally to the service manual and other training or service information such as Technical Bulletin.

Measurement was made with following equipment:

Logic Analyzer	• Phoenix version 2004/14.1.204
Oscilloscope	• Fluke PM 1000A/B
Spectrum Analyzer	• Advantest F3132 with an analog probe
Antenna Analyzer / SWR Tester	• Rohde & Schwarz ZNA 200
Multimeter	• Fluke 75 Series 2

While every endeavor has been made to ensure the accuracy of this document, some errors may exist. If the reader finds any errors, Nokia shall be notified in writing.

A NEW FEATURE FOR RM-159, 179

We have redefined these measurement points  which are related to the oscilloscope shown on the signal overview page. As example clicking on the measurement point  guide you to the matching oscilloscope on the signal overview page. The next click into the new chosen signal guide you to the related measurement point on the module. Finally, clicking OK, turn into the measurement point  on the module, takes you back to the starting point inside the schematics.

Do you have further improvement ideas or would like to give us feedback?

a useful reference **Mobile Computing, Applications, and Services** Petros Zerfos, Rebecca Montanari, Thomas Phan, 2010-06-08 This proceedings volume includes the full research papers presented at the First International Conference on Mobile Computing Applications and Services MobiCASE held in San Diego California during October 26-29 2009. It was sponsored by ICST and held in conjunction with the First Workshop on Innovative Mobile User Interactivity WIMUI. MobiCASE highlights state of the art academic and industry research work in main topics above the OSI transport layer with an emphasis on complete end-to-end systems and their components. Its vision is largely influenced by what we see in the consumer space today: high-end mobile phones, high bandwidth wireless networks, novel consumer and enterprise mobile applications, scalable software infrastructures, and of course an increasingly larger user base that is moving towards an almost a mobile lifestyle. This year's program spanned a wide range of research that explored new features, algorithms, and infrastructure related to mobile platforms. We received submissions from many countries around the world with a high number from Europe and Asia in addition to the many from North America. Each paper received at least three independent reviews from our Technical Program Committee members during the Spring of 2009 with final results coming out in July. As a result of the review process we selected 15 high quality papers and complemented them with six invited submissions from leading researchers, reaching the final count of 21 papers in the program.

Dyslexia in the Digital Age Ian Smythe, 2010-03-29 **Pervasive Computing** Jadwiga Indulska, Donald Patterson, Tom Rodden, Max Ott, 2008-05-16 On behalf of the Organizing Committee for Pervasive 2008, welcome to the proceedings of the 6th International Conference on Pervasive Computing. The year 2008 was the second time in as many years that the Pervasive conference has attempted to globalize. For the second year in a row, the conference was held outside of Europe. The conference is seen as one of the most respected venues for publishing research on pervasive and ubiquitous computing and captures the state of the art in pervasive computing research. In 2008, as in previous years, the proceedings present solutions for challenging research problems and help to identify upcoming research opportunities. Pervasive 2008 attracted 114 high quality submissions from which the Technical Program Committee accepted 18 papers, resulting in a competitive 15.8% acceptance rate. There were over 335 individual authors from 27 countries coming from a wide range of disciplines and from both academic and industrial organizations. Papers were selected solely on the quality of their peer reviews using a double-blind review process. The review process was carried out by 38 members of the international Technical Program Committee (TPC) who are experts of international standing. The TPC members were aided by 104 external reviewers. It was a rigorous review process in which each paper had at least four reviews: three reviews provided by the Committee members and one review written by an external reviewer. The reviews were followed by a substantive deliberation on each paper during an electronic discussion phase before the start of the Committee meeting.
