

Wintertime

In some locations, winter can be very cold. In the winter, many plants do not grow. Plants do perish. The ground may be covered in snow and ice. During the winter, it may be challenging for animals to find food. Animals cope with this period in a variety of ways.

Butterfly wings enable them to fly. Many of them leave before the winter arrives. They go away. They travel to an area with pleasant weather. Then, in the spring, they return home. It is known as migration. A good strategy to avoid the cold is to migrate. Tossing and turning while you're sick is an excellent strategy to avoid it. In the winter, many animals bury themselves. Their physical motion slows down. They conserve energy. They skip meals and survive on their fat.

They continue doing this until the food is again available. This is known as hibernation. Hibernation occurs in snakes, frogs, and bears. Winters and snow on the trees is beautiful. But it's also risky. And people are in danger as one could suffer from frostbite or worse.

Answer the following questions.

Q1. What is challenging for animals during winter?

A: _____

Q2. What do butterflies do during winter?

A: _____

Q3. What is migrating?

A: _____

Q4. How do snakes, frogs, and bears cope up with winters?

A: _____

Q5. How is wintertime dangerous for you?

A: _____
