

TWO SPECIES LEFT

Elephants are the largest land animals on earth today. There used to be hundreds of species, but today only the African and Asian elephant species exist.

OFF TO AFRICA

The African species of elephants has two subtypes: the Savanna and the Forest. The Savanna are much larger and their tusks curve outwards, where the Forest elephants are dark with tusks that are straight and point downwards. The Forest elephants have **adapted** to the forest habitat of the Congo Basin.

There has been a sharp decrease in the number of Forest elephants. These

elephants are poached due to their highly desirable ivory tusks. Only one-third of the African elephant population are of the Forest subtype.

OFF TO ASIA

The Asian elephants have a darker gray and brown coat with pink patches. The Asian species also have more rounded backs with a hump in the middle and shorter, thick legs. Because of their shorter frame and thick legs, these elephants are

stronger and more powerful than the African elephants.

Typically, the males and females of this species can be easily distinguished based on the fact that only males have tusks. But now, many males are **tuskless** because of poaching. The Asian elephants are also facing a loss of habitat because of the increase in the human population. This species is now endangered.

MATCHING THEM UP

The two species of elephants are visibly different by their tusks and weight. An African elephant **outweighs** an Asian elephant with an average weight difference of about 5,300 pounds. The African elephant stands between 8.2 and 13 feet tall, while an Asian elephant stands between 6.6 and 9.8 feet tall.

Africa and Asia are where the elephants are located. These elephants are more than 4,000 miles away from the U.S.A.

Words to Know

adapted: become adjusted to new conditions
tuskless: without tusks
outweighs: weighs more

Max Evans

Nonfiction Articles About Animals:

Animal Stories Max Evans, 2013-08-26 Legendary western author Max Evans has spent his entire life working with cows and horses. These rangeland animals and other creatures both domestic and wild play pivotal roles in his stories. This magnificent collection, beautifully illustrated by cowboy artist Keith Walters, showcases twenty-six animal tales penned by Evans during his long and celebrated career. Both fiction and nonfiction, the stories in this collection get us inside the heads and hearts of numerous four-legged critters: dogs, horses, burros, goats, cattle, deer, coyotes, and more. *The Old One*, for example, shows us the world through the eyes of a prairie dog as she watches her latest litter of pups rolling and tumbling around the mound and thinks of all the things she will need to teach them. And in *The One Eyed Sky*, an aging cow with a new calf and an old coyote with a litter to feed circle each other warily, trying to protect their young until a rancher intervenes. Not one to shy away from difficult subjects, Evans also delves into the animal nature of human beings as in *The Heart of the Matter*, where two Vietnam vets and friends kill a deer and then turn their rifles on each other. These captivating tales display Evans's trademark mix of raucous humor and vivid poetic descriptions of the high plains of West Texas and his beloved Hi Lo Country in northeastern New Mexico. He reminds his readers of simpler times and more honorable people even as he evokes the merciless environment in which his characters, both animal and human, struggle to survive.
