

KNOW YOUR CORDLESS NAILER & STAPLE

ASSEMBLING NAILS

NOTE : This stapler/nailer only accepts 3/8 in. crown with 1/4-9/16 in. long staples, other types of staples, including paper staples, will jam the unit. For best results, load a full low of staples before use.

1. Remove the battery pack.
2. Hold the tool upside down.
3. Depress the lock button on back of magazine and pull the magazine out of the tool.
4. Insert a row of staples into the opening behind that nose piece.
5. Push the loaded magazine back into the unit until it clips into place.

NOTE : This stapler/nailer only accepts 5/8 in. long 18 gauge brad nails, other types of nails will jam the unit.

1. Hold the tool upside down.
2. Depress the lock button on back of magazine and pull the magazine out of the tool.
3. Insert a row of nails into the opening behind that nose piece. Be sure that to place the nails to the marked side with " Load Side" and nail head is against the internal groove.
4. Push the loaded magazine back into the unit until it clips into place.

IMPACT FORCE PRESELECTION

WARNING!

Some jobs require a light touch than others, reducing the force that staples or nails are fired at reduces the chance of damage thinner, more dictated surfaces.

NOTE : After marking any adjustments, always test the settings on a piece of scrap material. If you are shooting soft material, the adjustment of the driving force may not have a noticeable effect on the shooting.

- To adjust the force of the nail gun/stapler, turn the dial clockwise to increase the drive force. Turn the dial counterclockwise to decrease the drive force. The drive force indicator also shows increase or decrease.

NOTE : Always keep your fingers away from the discharge area of the tool when driving a staple and when using the accessory to install screen or wire. Failure to keep fingers out of the way can result in serious personal injury

DRIVING PIN NAILS

WARNING!

Do not point this device at yourself or others. Unintentional firing may cause personal injuries.

Technology Assessment of Automation Trends in the Modular Home Industry Philip H. Mitchell, 2009 This report provides an assessment of technology used in manufacturing modular homes in the United States and that used in the German prefabricated wooden home industry It is the first step toward identifying the research needs in automation and manufacturing methods that will facilitate mass customization in the home manufacturing industry Within the United States a relatively low level of technology was found in domestic modular home manufacturers Raw material transportation was mostly manual manually operated saws sized raw materials cranes were used to move subassemblies and modules were pushed by hand or with a battery powered pusher German prefabricated home manufacturers used closed panels to construct walls roofs and floors rather than modular construction Three levels of automation were identified manual semi automated and fully automated Manual production methods were similar to those found in the United States In semi automated factories automated machinery was used but an operator was required to manually load unload and start the machine The fully automated factories had equipment capable of machining and transferring panel components and placing and fastening components together Such investment in automation is risky in the cyclic housing industry The modular factory has elevated homebuilding from a craft to mass production but flexibility is reduced and significant customization is difficult Future research should examine the cost effectiveness of using high levels of automation software and equipment in the U S homebuilding industry and whether it can profitably provide the manufacturing flexibility for mass customization Alternatively the use of lean manufacturing in modular home factories to realize the same benefits needs to be examined
