The Mercersburg Review ,1877 Creating a Forestry for the 21st Century Kathryn A. Kohm, Jerry F. Franklin, 1997 Over the past decade a sea change has occurred in the field of forestry A vastly increased understanding of how ecological systems function has transformed the science from one focused on simplifying systems producing wood and managing at the stand level to one concerned with understanding and managing complexity providing a wide range of ecological goods and services and managing across broad landscapes Creating a Forestry for the 21st Century is an authoritative and multidisciplinary examination of the current state of forestry and its relation to the emergent field of ecosystem management Drawing upon the expertise of top professionals in the field it provides an up to date synthesis of principles of ecosystem management and their implications for forest policy Leading scientists including Malcolm Hunter Jr Bruce G Marcot James K Agee Thomas R Crow Robert J Naiman John C Gordon R W Behan Steven L Yaffee and many others examine topics that are central to the future of forestry new understandings of ecological processes and principles from stand structure and function to disturbance processes and the movement of organisms across landscapes challenges to long held assumptions the rationale for clearcutting the wisdom of short rotations the exclusion of fire traditional tools in light of expanded goals for forest landscapes managing at larger spatial scales including practical information and ideas for managing large landscapes over long time periods the economic organizational and political issues that are critical to implementing successful ecosystem management and developing institutions to transform knowledge into action Featuring a 16 page center section with color photographs that illustrate some of the best on the ground examples of ecosystem management from around the world Creating a Forestry for the 21st Century is the definitive text on managing ecosystems It provides a compelling case for thinking creatively beyond the bounds of traditional forest resource management and will be essential reading for

students scientists working in state federal and private research institutions public and private forest managers staff members of environmental conservation organizations and policymakers Principles of Environmental Economics and Sustainability Ahmed Hussen, 2012-11-12 Recent years have witnessed considerable consolidation between the disciplines of environmental and ecological economics at research level but until now textbooks in the area have done little to reflect this Ahmed Hussen's book is to date the only one to reconcile the two standpoints The central focus of the book will continue to be on this systematic integration of both mainstream and ecological approaches to environmental economics and an acknowledgement that enduring solutions to major contemporary environmental challenges can be obtained through studies based on a well conceived and balanced interdisciplinary approach However this third edition also contains much that is new Chiefly brand new chapters appear covering the following topics The economics of climate change The economics of biodiversity and ecosystem services Green accounting and alternative economic and social indicators of sustainability The business case for environmental sustainability An Appendix that provides a brief historical account of the development of ecological economics The result is a comprehensive introduction to the main facets of environmental and ecological economics a text that boldly refuses to put up barriers between disciplines and takes a holistic approach to vital issues This student friendly textbook contains a variety of study tools including learning points boxed features case studies revision questions and discussion questions and an Appendix that provides students with a review of basic economic principles relevant to the study of the environment and its management Written in a clear and accessible style this book will prove an excellent choice for introducing both students and academics to the world of environmental economics
