Gods in the Global Village Lester R. Kurtz, 2012 In an era plagued by religious conflict the Third Edition of Gods in the Global Village directly responds to issues of social problems prevalent in

the world today Using an engaging thought provoking style author Lester R Kurtz focuses on the relationship among the major faith traditions that inform the thinking and ethical standards of most people in the emerging global social order This book focuses on a central aspect of that common crisis A major assumption of this book is that all knowledge is shaped by the social context of the knower therefore both religious traditions and our studies of them are shaped by the context in which we construct them The author argues that religious pluralism will be a necessary precondition of the global village for the foreseeable future The question that faces us as a human community is not Which religious tradition is true or even Is any religious tradition true but rather How can we enable the various religious and secular traditions to coexist peacefully on the planet The text supports the belief that the sociology of religion itself a pluralistic discipline can provide invaluable insight into the most pressing problems of our time

Rahul, Purushottam Kumar, Immanuel Dahagani, Sukhpal Singh, Padmini Swaminathan, 2022-05-26 This book provides a firm analytical base to discussions about injustice and the unequal distribution of gains from global production in the form of global monopsony capitalism It utilizes the concept of reverse subsidies as the purchase of gendered labour and environmental services below their costs of production in garment value chains in India and other garment producing countries such as Bangladesh and Cambodia Environmental services such as freshwater for garment manufacture and land for cotton production are degraded by overuse and untreated waste disposal The resulting higher profits from the low prices of garments are captured by global brands using their monopsony position with few buyers and myriad sellers in the market This book links the concept of reverse subsidies with those of injustice inequality and sustainability in global production
