Resources in Education ,1998 **Climate Change Education Across Disciplines K-12** Lauren Madden,2025-02-15
Climate change is one of the greatest challenges humanity has ever faced One of the most effective ways to combat climate change is education In New Jersey standards to support teaching and learning about climate change were introduced for children of all ages beginning in 2022 In this edited volume experts from across the state offer strategies suggestions advice and vignettes to support educators as they begin to implement climate change instruction in their classrooms With a foreword by our state s First Lady Tammy S Murphy it also includes a scientific perspective on the effects of climate change in New Jersey the history of climate change education in the US and perspectives from colleagues in other states who are also beginning to adopt instructional practices to address this important topic **New Jersey World Languages Curriculum Framework** ,1999 *Research in Education* ,1973 *Meeting the Challenges to Measurement in an Era of Accountability* Henry Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license *Lasting Change in Foreign Language Education* John L. Watzke,2003-03-30 *Lasting Change in Foreign Language Education* presents a historical account of foreign language in general education The author examines the struggle of this subject discipline to align with the changing mission of secondary education as it emerged as the predominant institution enrolling students in the study of second languages This 100 year history suggests trends persistent across major periods of reform to explain current problems in the expansion of learning opportunities in foreign language Included is a complete database of education statistics on foreign language education and national and state education law from 1899 to the present

Analysis of this data is presented in multiple formats to describe the historical capacity of the education system to achieve reform. A review of contemporary standards based education initiatives in states and school districts similarly serves to reflect how historical trends continue to restrict change. Concise policy implications are suggested as a means to address historical precedence and the greater mission of general education in the development of education policy and its transformation into practice. Policy development must include a greater understanding of the historical development of foreign language in general education. This vital link has been lacking in the past century as foreign language has struggled to realign itself with the changing mission of general education. For example, there are distinct curricular differences between a general education for all students and one for leadership and higher education. Only the latter makes room for solid foreign language education. In addition, the study of foreign language has remained primarily a beginning level endeavor for the majority of students over the past century. This trend results in significant pressure on the beginning level curriculum particularly during periods of reform to provide multiple academic outcomes in education.
