Family Men Laura King,2015 Fathers are often neglected in histories of family life in Britain Family Men provides the first academic study of fathers and families in the period from the First World War to the end of the 1950s It takes a thematic approach examining different aspects of fatherhood from the duties it encompassed to the ways in which it related to men s identities The historical approach is socio cultural each chapter examines a wide range of historical source materials in order to analyse both cultural representations of fatherhood and related social norms as well as exploring the practices and experiences of individuals and families It uncovers the debates surrounding parenting and family life and tells the stories of

men and their children While many historians have examined men s relationship to the home and family in histories of gender family life domestic spaces and class cultures more generally few have specifically examined fathers as crucial family members as historical actors and as emotional individuals The history of fatherhood is extremely significant to contemporary debate assumptions about fatherhood in the past are constantly used to support arguments about the state of fatherhood today and the need for change or otherwise in the future Laura King charts men s changing experiences of fatherhood suggesting that although the roles and responsibilities fulfilled by men did not shift rapidly their relationships position in the family and identities underwent significant change between the start of the First World War and the 1960s

advice on layout and featuring samples for every occasion Documentary Arabic Private and Business Letters on Papyrus
Eva Mira Grob, 2010 Arabic letters on papyrus challenge the modern reader There are few to no diacritical dots to distinguish homographs no systematic spacing between single words and in the majority of cases a low degree of graphical structuring However contemporary readers usually read and understood these documents easily probably because the recipient of a letter knew what to expect The letters are formulaic and their information packaging follows an algorithm typical for their time and content Here formulaic letter writing means not only the reuse of the same formulae or topoi but expressing thoughts in a predictable linguistic way and order both as a matter of readability and as one of adequacy and politeness The main concern of this work is to discover these unwritten rules and norms behind Arabic letter writing on papyrus
