European Dept.,2014-09-18 The Selected Issues paper investigates options for improving the efficiency of the Italian judicial
system and closing the regional performance gap Better courts would bring about macroeconomic benefits including
increased employment opportunities and higher productivity investment and research and development The Italian financial
system faces several challenges in order to restore profitability under weak growth conditions and to adapt to a changing
global environment This chapter explores ways of improving profitability and the challenges of shifting from a bank based
financial system common in EU countries to a more market based system Along with this shift comes a diversification of
financing sources led by further development of capital markets Budget allocation in Italy will need to increasingly rely on
efficiency analysis to find savings and improve performance The analysis in this chapter finds that large social spending in
Italy particularly current pensions will need to be tackled to generate sizable expenditure savings In education and non
pension social protection there is scope for improving outcomes with current resources In other areas reducing cross
regional variation in spending efficiency could also lead to savings Reforms should focus on court management
rationalization of the appeal system reduction of the backlog of pending cases and wider use of out of court mediation
