Homeschool Curriculum Cathy Duffy, 2005 A critical volume for the homeschooling community that helps parents make informed choices regarding learning styles and curriculum Century of Difference Claude S. Fischer, Michael Hout, 2006-11-16 In every generation Americans have worried about the solidarity of the nation Since the days of the Mayflower those already settled here have wondered how newcomers with different cultures values and frequently skin color would influence America Would the new groups create polarization and disharmony Thus far the United States has a remarkable track record of incorporating new people into American society but acceptance and assimilation have never meant equality In Century of Difference Claude Fischer and Michael Hout provide a compelling and often surprising new take on the divisions and commonalities among the American public over the tumultuous course of the twentieth century Using a hundred years worth of census and opinion poll data Century of Difference shows how the social cultural and economic fault lines in American life shifted in the last century It demonstrates how distinctions that once loomed large later dissipated only to be replaced by new ones Fischer and Hout find that differences among groups by education age and income expanded while those by gender region national origin and even in some ways race narrowed As the twentieth century opened a person's national origin was of paramount importance with hostilities running high against Africans Chinese and southern and eastern Europeans Today diverse ancestries are celebrated with parades More important than ancestry for today's Americans is their level of schooling Americans with advanced degrees are increasingly putting distance between themselves and the rest of society in both a literal and a figurative sense Differences in educational attainment are tied to expanding inequalities in earnings job quality and neighborhoods Still there is much that ties all Americans together Century of Difference knocks down myths about a growing culture war Using seventy years of survey data Fischer and Hout show that Americans did not become more fragmented over values in the late twentieth century but rather were united over

shared ideals of self reliance family and even religion As public debate has flared up over such matters as immigration restrictions the role of government in redistributing resources to the poor and the role of religion in public life it is important to take stock of the divisions and linkages that have typified the U S population over time Century of Difference lucidly profiles the evolution of American social and cultural differences over the last century examining the shifting importance of education marital status race ancestry gender and other factors on the lives of Americans past and present A Volume in the Russell Sage Foundation Census Series *Catalog of Copyright Entries.
