European Dept., 2023-06-07 After a strong recovery from the pandemic higher international commodity prices moderated GDP growth in 2022 which posted 3.5 percent while inflation exceeded 11 percent Lower commodity prices in 2023 will provide much needed relief to households and firms This together with supportive fiscal policy especially higher public investment absorption will underpin higher growth of about 4 percent and lower inflation which should slow to 5.6 percent Risks continue to be mainly on the downside higher commodity prices would lead to lower growth and higher inflation and tighter financial conditions would weigh on bank asset quality and liquidity

Republic of Serbia International Monetary, International Monetary Fund. European Dept., 2023-07-05 Serbia has made impressive economic gains over much of the past decade living standards improved inflation fell public finances were strengthened and reserves increased helped by ample foreign direct investment FDI inflows But spillovers from the war in Ukraine especially the sharp increase in international energy prices and deep rooted problems in Serbia's energy sector that came to a head last year led to large

external and fiscal financing needs prompting the authorities to request a Fund supported Stand By Arrangement SBA Fiscal and external outturns for 2022 were both better than expected and unemployment remains low Record FDI inflows continue to drive reserves higher But inflation remains a pressing challenge Led by high food and energy prices headline inflation is now well above the National Bank of Serbia's NBS's target band and core inflation has also increased sharply Fiscal policy is expected to remain relatively tight in 2023 despite additional mid year spending measures Deep structural problems persist in the energy sector and are a key focus of the SBA Long standing geopolitical challenges remain

Bolivia International Monetary Fund,2004-01-14 Bolivia's pursuit of structural reforms has begun to yield results despite the difficult social and political context The fiscal performance under the program needs to be substantially strengthened The recent passage of the informal corporate workout law represents a substantial advance in financial and corporate restructuring Executive Directors are in agreement with the government on the approach to reduce banking system fragility To sustain economic growth the pace of structural reforms has to be invigorated Firm implementation of the program can achieve its goals

Dominica International Monetary Fund,2004-01-12 In this study the authorities outlined a two stage strategy and explained the need for requesting the cancellation of Stand By Arrangement and the approval of a Three Year Arrangement Under the Poverty Reduction Growth Facility PRGF The objective of the three year program is to review growth by addressing the debt overhang and structural weaknesses The underlying concept of fiscal reform is to support the achievement of the medium term primary surplus target The authorities will implement a number of initiatives to strengthen the investment climate in the economy

Romania International Monetary Fund,2003-05-07 This paper assesses Romania's Third Review Under the Stand By Arrangement and a Request for Waiver of Performance Criterion Romania's macroeconomic performance continued to be favorable but slippages in wage policy and privatization delayed the completion of the third review Robust GDP growth continued throughout 2002 and progress in reducing inflation and the current account deficit was better than targeted However financial discipline in the state owned sector remained weak and the end September performance criterion on the wage bill in monitored state owned enterprises was not observed

Iraq International Monetary Fund,2007-03-22 This paper discusses key findings of the Third and Fourth Reviews Under the Stand By Arrangement SBA for Iraq Economic growth in 2006 was below target because oil production did not increase as projected This reflected lower than planned investment and the lack of security Inflation increased to 65 percent in 2006 to December 2006 This was mainly owing to shortages of key commodities caused in part by the ongoing insurgency The underlying rate of inflation has also remained high

Republic of Kosovo International Monetary Fund. European Dept.,2023-11-20 Context Outlook and Risks GDP growth is expected to average 4 percent per

annum over 2023 24 on lower international commodity prices vigorous diaspora flows and sound macroeconomic policies
Average inflation is projected to decline to about 5 percent in 2023 and 31 2 percent in 2024 Risks to growth are balanced on
the short term but on the downside in the medium term given the complex geopolitical scenario
