Environmental Science William P. Cunningham,Mary Ann

Cunningham,Barbara Woodworth Saigo,2003-03 This book is intended for use in a one or two semester course in

environmental science human ecology or environmental studies at the college or advanced placement high school level

Because most students who will use this book are freshman or sophomore nonscience majors the authors have tried to make the text readable and accessible without technical jargon or a presumption of prior science background At the same time enough data and depth are presented to make this book suitable for many upper division classes and a valuable resource for students who will keep it in their personal libraries after their formal studies are completed The goal of this book is to provide an up to date introductory view of essential themes in environmental science along with emphasis on details and case studies that will help students process and retain the general principles
