Play It Again, Sam Samuel Jay Keyser, 2025-05-27 Why we enjoy works of art and how repetition plays a central part in the pleasure we receive Leonard Bernstein in his famous Norton Lectures extolled repetition saying that it gave poetry its musical qualities and that music theorists' refusal to take it seriously did so at their peril Play It Again Sam takes Bernstein seriously In this book Samuel Jay Keyser explores in detail the way repetition works in poetry music and painting He argues for example that the same cognitive function underlies both how poets write rhyme in metrical verse and the way songwriters like Duke Ellington and Billy Strayhorn Satin Doll and Richard Rodgers and Lorenz Hart My Funny Valentine construct their iconic melodies Furthermore the repetition found in these tunes can also be found in such classical compositions as Mozart's Rondo alla Turca and his German Dances as well as in galant music in general The author also looks at repetition in paintings like Gustave Caillebotte's Rainy Day in Paris Andy Warhol's Campbell's Soup Cans and Jackson Pollock's drip paintings Finally the photography of Lee Friedlander Roni Horn and Osmond Giglia Giglia's Girls in the Windows is one of the highest grossing photographs in history are all shown to be built on repetition in the form of visual rhyme The book ends with a cognitive conjecture on why repetition has been so prominent in the arts from the Homeric epics through Duke Ellington and beyond Artists have exploited repetition throughout the ages The reason why is

Zondor the Great John Greenridge, 2010 The events depicted in this book have all been adapted and embellished in order to create this science fiction novel spot the join if you can However most of the content espouses a more or less true record of time travels by the author The scientific theory embodied within the novel should give cosmic scientists a nudge in the right direction It offers a brand new hypothetical understanding of how the Universe actually operates John knows that as normal living and breathing human beings rather than the Mechanical Intelligent Memory Units MIM Units as described by Zondor you won't be tempted to believe this story That is until it happens to you the average sane human reader Yet recent scientific discoveries offer some credence to the tale Those new theories while similar to my experience depend on the idea of the projection of the Universe as a hologram and modern scientists owe some sympathy to the idea They have not had the dubious benefit of my experiences as a guide however So the idea of projecting serial electronic pictures across a time continuum and onto an event horizon has not hit the new science headlines so far even though the technology exists for such events Like all new science my idea will have its arm chair critics The reader of this book is about to become one of those critics To the sceptic I would ask the question How long is it since radio and television were invented discovered If you wrote a book about radio and television in the 19th Century would you have ended up in the loony bin Most likely John Greenridge 2009
