

AMERITRON ALS-600

600 WATT ~~NO TUNE~~ TMOS-FET AMPLIFIER

INSTRUCTION MANUAL

The Ameritron ALS-600 is a 600 watt output, solid state, linear amplifier using state-of-the-art, high voltage, RF TMOS FET devices in the power output section. The ALS-600 provides continuous frequency coverage from 1.5 through 22 MHz with no tuning adjustments. Broad band 5 pole low pass filters provide output harmonic suppression in excess of all FCC requirements. Export modifications are available to extend operation up to 30 MHz with a copy of a valid amateur license.

The ALS-600 uses four MRF-150 FET's operating at 50 volts in a double ended push-pull parallel output configuration. High quality RF components combine with an accurate peak detecting directional coupler, front panel adjustable ALC circuit with automatic SWR fold-back, and one switch frequency selection to make this one of the easiest to operate amplifiers available. The matching power supply, ALS-600PS, is shipped factory wired for 120 volt, 50/60 Hz power mains and is easily converted to other supply voltages between 100 and 240 volts.

PLEASE READ THIS MANUAL BEFORE OPERATING THIS EQUIPMENT !
