

Haikus - 5-7-5

1.

You promise me peace
If I keep my eyes on You
How will that help me?

2.

I am scared inside
I have no control at all
I need your peace, Lord

3.

Big angry spiders
Savaging my heart and soul
Stepping over glass

4.

Do I deserve this?
Could this be my just deserts?
Am I coming home?

5.

Swing your heavy scythe
Cutting me down in my prime
Your harvest is cruel

Practical Poetry Sara Holbrook,2005 In Practical Poetry Sara Holbrook shows you how the precise language and keen observations of poems can be used as nuts and bolts tools for addressing content and language standards in four key subject areas

Numeracy and Mathematics Across the Primary Curriculum David Coles,Tim Copeland,2014-04-08 The key to good primary teaching of numeracy and mathematics is confidence in mathematical knowledge and its relevance to the real world In particular effective implementation of the National Numeracy Strategy requires student teachers primary teachers and mathematics coordinators to realize the place of mathematics across the range of National Curriculum subjects This book explores mathematics as a set of tools for thinking about designing evaluating and changing the world of the child through the

broader curriculum rather than focusing on skills and concept building exclusively in the mathematical world Practical activities are included to stimulate readers to apply these ideas with confidence both within and beyond the mathematics lesson

Math through Children's Literature Kathryn Braddon, Nancy Hall, Dale Taylor, 1993-02-15 Use children's literature as a springboard to successful mathematical literacy This book contains summaries of books each related to the NCTM Standards that will help children gain familiarity with and an understanding of mathematical concepts Each chapter has classroom tested activities and a bibliography of additional books to further expand student learning

Math in the Time of Corona Alice Wonders, 2021-11-08 The title of this book Math in the Time of Corona has been drawn from the highly acclaimed novel by Gabriel Garcia Marquez Love in the Time of Cholera The volume editor Alice Wonders holds a fictitious name that represents the mathematics publishing group at Springer Nature Undeterred by disasters so many mathematical and scientific discoveries have been made during times of duress or confinement Unlike most any other subject mathematics may be researched from anywhere Covid 19 like Cholera implementation of vaccinations have been uneven throughout the globe since the beginning of 2021 However there has been a renewed hope for a return to normalcy though the timing will no doubt vary worldwide Essays in this volume vary in topic and are written by members of the greater mathematics community hence the use of Math in the book title They recount or describe significant or noteworthy discoveries musings award winnings eureka moments challenges solutions inspirations etc that have resulted from or have occurred during an unprecedented global pandemic Several of the authors have been involved in starting new research and devising new methodologies related to society's response to the outbreak and its ability to self organize during a dramatic and complex situation Some contributions describe how mathematical models and the management of big data have proved to be fundamental tools for the interpretation of epidemic activity and development of coping mechanisms

Where's the Wonder in Elementary Math? Judith McVarish, 2012-08-21 This book argues that even in today's high stakes testing environment teaching to the test need not be teachers only focus as they introduce young children to mathematics Judith McVarish demonstrates how building a community of learners and using problem solving to engage students can help teachers encourage students disposition to creative thinking and reasoning skills that can otherwise become lost due to the pressure of the many other expectations placed upon both teachers and students This book offers strategies for infusing mathematics learning and reasoning into elementary school classrooms while meeting curriculum and testing mandates The teacher researcher component of each chapter provides a vehicle for teachers to bring their own expertise and questions back into the teaching and learning equation

Numeracy in Authentic Contexts Maura Sellars, 2017-10-25 This book is based on the notion that there are many ways in which mathematics learning can be achieved for students and that not all of them are focused on the mathematics classroom It explores the foundational numeracy principles of the non mathematical subject areas and aligns these to the Australian numeracy learning continuum It demonstrates in detail the extent to which

numeracy competencies underpin successful learning in all the subject areas of the curricula It validates a focus of developing numeracy competencies through learning in the arts science and other discipline areas with which school students to engage with in order develop holistically but which are not subjected to national assessment practices It is developed around the notion of praxis putting theory into practice in order to respond to the urgent need for students to be supported in their efforts to increase their numeracy capabilities in a world where extensive amounts of new information are often presented in graphical or data based formats Additionally it offers perspectives on developing all students capacities to become numerate in school contexts and presents inclusive differentiated lesson examples as an alternative way of exploring numeracy in the context of teaching and learning in real world classroom contexts [Rigor Is NOT a Four-Letter Word](#)
