At some point in your study of psychology, you may be required to write a case study. These are often used in clinical cases or in situations when lab research is not possible or practical. In undergraduate courses, these are often based on a real individual, an imagined individual, or a character from a television show, film, or book.

The specific format for a case study can vary greatly. In some instances, your case study will focus solely on the individual of interest. Other possible requirements include citing relevant research and background information on a particular topic. Always consult with your instructor for a detailed outline of your assignment.

A Handbook of Research Methods for Clinical and Health Psychology Jeremy Miles, Paul Gilbert, 2005 Though psychology as a discipline has grown enormously in popularity in recent years compulsory courses in research methods and statistics are seldom embarked upon with any great enthusiasm within the undergraduate and postgraduate communities Many postgraduate and PhD students start their research ill equipped to design effective experiments and to properly analyse their results This lack of knowledge also limits their ability

to critically assess and evaluate research done by others This book is a practical guide to carrying out research in health psychology and clinical psychology It bridges the gap between undergraduate and postgraduate study As well as describing the various techniques and methods available to students it provides them with a proper understanding of what a specific technique does going beyond the introductory descriptions typical of most undergraduate methods books The book describes both quantitative and qualitative approaches to data collection providing valuable advice on methods ranging from psychometric testing to discourse analysis For both undergraduate and postgraduate students the book will be essential in making them aware of the full range of techniques available helping them to design scientifically rigorous experiments and effectively analyse their results
