Towell,2003-08-14 Second language acquisition has to integrate the totality of the SLA process which includes both the learning of the core syntax of a language and the learning of the lexical items that have to be incorporated into that syntax But these two domains involve different kinds of learning Syntax is learnt through a process of implementing a particular set of universal structures whereas the learning of lexis is characterised by the building up of associations or connections Yet these two systems must come together in the creation of a whole linguistic system in the mind of an individual This book is designed to state the implications of these two paradigms in as clear a way as possible through examples of the research carried out within each paradigm and to examine how they can be made to inter relate in a way which would enable us to explain better the overall process of SLA *Planning and Task Performance in a Second Language* Rod Ellis,2005-03-11 The last decade has seen a growing body of research investigating various aspects of L2 learners performance of tasks This book focuses on one task implementation variable planning It considers theories of how opportunities to plan a task affect performance and tests claims derived from these theories in a series of empirical studies The book examines different types of planning i e task rehearsal pre task planning and within task planning addressing both what learners do when they plan and the effects of the different types of planning on L2 production The choice of planning as the variable for investigation in this book is motivated both by its importance for current theorizing about L2 acquisition in particular with regard to cognitive theories that view acquisition in terms of information processing and its utility to language teachers and language testers for unlike many other constructs in SLA planning lends itself to external manipulation The study of planning then provides a suitable forum for demonstrating the interconnectedness of theory research and pedagogy in SLA **The Acquisition of English Restrictive Relative Clauses by Hungarian Learners of English** Judit Kiss-Gulyás,2004 The present work uses the standard version of principles and parameters theory of Universal Grammar to address second language acquisition issues It is assumed that comparative analysis of Hungarian

and English based on the model enables the researcher to formulate precise and testable questions and the empirical research provides reliable answers The investigated area is the acquisition of English restrictive relative clauses by L1 Hungarian learners of L2 English This area of grammar causes problems most of these are proficiency determined but there are some which are observable even at fairly advanced levels In the given framework it is postulated that some properties of parameters set differently for the L1 can be reset to the new language whereas other properties seem to resist re setting and remain non native like in the interlanguage of even near native L2 English speakers of L1 Hungarian The book may interest pure and applied linguists psycholinguists as well as practising teachers as it attempts to offer a possible answer to the often made observation there are parts of L2 grammar which are relatively easy to acquire despite the language differences yet there are several features that remain faulty or misunderstood despite teacher and learner effort BOOK JACKET

Initial State Megan M. Brown-Bousfield, Suzanne Flynn, Éva Fernández-Berkes, 2023-10-15 To date the field of L3 acquisition research has had a heavy focus on the initial state of the L3 grammar While this initial state research is critical to

understanding L3 acquisition as a whole in order for an explanatory understanding of language acquisition in the multilingual mind the field needs to expand its scope beyond this area of focus This volume brings together L3 acquisition and multilingualism researchers in order to discuss the state of the field and introduce new ideas related to the development of post initial L3 knowledge and the relationship among languages in the multilingual mind It includes contributions related to syntactic phonological and lexical development beyond the L3 initial state The purpose of this volume is to expand the current academic discussions within this field by emphasizing the role of the developmental process in an L3 context with the hope of inspiring further research in this domain

Gesture in Language Aliyah Morgenstern, Susan Goldin-Meadow, 2021-12-06 Through constant exposure to adult input in interaction children s language gradually develops into rich linguistic constructions containing multiple cross modal elements subtly used together for communicative functions Sensorimotor schemas provide the grounding of language in experience and lead to children s access to the symbolic function With the emergence of vocal or signed productions gestures do not disappear but remain functional and diversify in form and function as children become skilled adult multimodal conversationalists This volume examines the role of gesture

over the human lifespan in its complex interaction with speech and sign. Gesture is explored in the different stages before and during and after language has fully developed and a special focus is placed on the role of gesture in language learning and cognitive development.
