Economics as Rhetoric Anne Isla, 2024-07-26 Bernard Maris was killed in Paris on January 7 2015 during the terrorist attack against the satirical magazine Charlie Hebdo He remains one of the most original intellectuals of contemporary France but despite being a uniquely original heterodox thinker his international reputation has been compromised by the fact that his writings are inaccessible to non French speakers This book remedies that By providing an overview of Bernard Maris life and intellectual trajectory as well as an English translation of an anthology of his most relevant writings this volume

provides the international audience for the first time ever the chance to know and understand the contribution of this major heterodox economist An outstanding and atypical figure in economic thought and a virulent critic of mainstream dominant economics he was also an all round actor and thinker of his time Through rigorous reasoning he questioned the notion of well being which he argued is too often conflated with having more Enslavement by work or the endless destructive accumulation of natural wealth is also inherent to the capitalist system Probably his most original contribution is his epistemological reflection on the very nature of economics and his appraisal of this discipline as a form of rhetoric This book will be of great interest to readers in heterodox economics economic methodology epistemology and French literature and culture more broadly

Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa Nojiyeza, Innocent Simphiwe, Mtapuri, Oliver, Bazaanah, Prosper, Netshiozwi, Edzisani Ellen, 2022-01-28

Access to water and sanitation remains a critical challenge in various countries in Africa. The crisis remains the crisis of governance rather than the physical and economic scarcity. In most countries, water is realized as a human right and subsidies are provided for the indigent households. The tricky issue in rural areas remains an issue of access that is often linked to willingness and ability to pay for the installation and daily consumption. The Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa presents practical examples of integrated water resources management (IWRM) implementation in African countries. It further addresses the contemporary issues of alternative energy as part of climate change mitigation and utilizes case studies to examine how communities adapt to climate change. Covering topics such as climate justice, ecological governance, and political ecology, this major reference work is a dynamic resource for government officials, sociologists, climate scientists, activists, students, and educators of higher education, academicians, and researchers in the fields of social sciences, government developmental studies, international relations, and political science.

Kerala Transforming P.L. Beena, Thiagu Ranganathan, 2025-07-18. This book examines Kerala's recent development trajectory and highlights the impact of COVID-19 on its economy. It analyzes Kerala's growth and structural transformation while engaging critically with issues related to employment and migration. The book delves into policies aimed at reintegrating return migrants into Kerala's development process. It examines the implications of Free Trade Agreements and policies initiated by the Government of India under the WTO regime on agriculture. The chapters in the book also investigate the impact of the growth trajectories on distributional aspects of inequality and social mobility. Timely and topical, the book will be an indispensable resource for students and researchers of economics, development studies, trade, labour, and migration, political economy, Kerala economy, and South Asian studies.

Climate Change Effects on Civil Infrastructure Mohammed M. Ettouney, 2025-03-31 Climate change challenges are unlike any hazard that infrastructure and related shareholders have faced for millennia These challenges and the systems that are vulnerable to them as well as the resulting consequences social economic physical natural health costs etc are interrelated in countless ways and span regions countries oceans and continents The design analysis maintenance operations economics and life cycle of civil infrastructure are dependent upon climatic effects and this book addresses the intersections between climate change infrastructures and related decision paradigms such as risk resilience preparedness adaptation or mitigation from the viewpoint of climate change demands Presents an objective categorization of climate change demands as related to civil infrastructure and society Offers a comprehensive roadmap on how to plan for and address climate change effects on civil infrastructure Includes numerous objective and practical case studies throughout to highlight important subjects

Microeconomics R. Glenn Hubbard, Anne M. Garnett, Philip Lewis, Anthony Patrick O'Brien, 2014-09-01 Microeconomics is the most engaging introductory economics resource available to students today Using real businesses examples to show how managers use economics to make real decisions every day the subject is made relevant and meaningful Each chapter of the text opens with a case study featuring a real business or real business situation refers to the study throughout the chapter and concludes with An Inside Look a news article format which illustrates how a key principle covered in the chapter relates to real business situations or was used by a real company to make a real business decision Solved problems in every chapter motivate learners to confidently connect with the theory to solve economic problems and analyse current economic events

Microfoundations of Evolutionary Economics Yoshinori Shiozawa, Masashi Morioka, Kazuhisa Taniguchi, 2019-06-27 This book provides for the first time the microfoundations of evolutionary economics enabling the reader to grasp a new framework for economic analysis that is compatible with evolutionary processes Any independent approach to economics must include a value theory or price theory and price and quantity adjustment processes Evolutionary economics has rightly and successfully concentrated its efforts on explaining evolutionary processes in technology and institutions However it does not have its own value theory and is not capable of explaining the workings of everyday economics processes in which any evolutionary process would take place Our

point of departure is the addition of myopic agents with severely limited rational and forecasting capacities in stark contrast to mainstream economics We show how myopic agents in a complex world can produce a stable price system and demonstrate how they can adjust their production to changing demand flows Agents behave without any knowledge of the overall process and they generate a stable economy as large as the global network of exchanges This is the true miracle of the market mechanism In contrast to mainstream general equilibrium theory this miracle can be explained without the need for an auctioneer or infinitely rational agents Thanks to this book evolutionary economics can now claim to be an independent approach to economics that can completely replace mainstream neoclassical economics
