Popular Children's Literature in Britain Julia Briggs, Dennis Butts, 2016-12-05 The astonishing success of J K Rowling and other contemporary children's authors has demonstrated how passionately children can commit to the books they love But this kind of devotion is not new This timely volume takes up the challenge of assessing the complex interplay of forces that have created the popularity of children's books both today and in the past The essays collected here ask about the meanings and values that have been ascribed to the term popular They consider whether popularity can be imposed or if it must always emerge from children's preferences And they investigate how the Harry Potter phenomenon fits into a repeated cycle of success and decline within the publishing industry Whether examining eighteenth century chapbooks fairy tales science schoolbooks Victorian adventures waif novels or school stories these essays show how historical and publishing contexts are vital in determining which books will succeed and which will fail which bestsellers will endure and which will fade quickly into obscurity As they considering the fiction of Angela Brazil Enid Blyton Roald Dahl and J K Rowling the contributors carefully analyse how authorial talent and cultural contexts combine in often unpredictable ways to generate and sometimes even sustain literary success

Children, Film and Literacy Becky Parry, 2013-10-22 Children Film and Literacy explores the role of film in children's lives The films children engage in provide them with imaginative spaces in which they create play and perform familiar and unfamiliar fantasy and everyday narratives and this narrative play is closely connected to identity literacy and textual practices Family is key to the encouragement of this social play and at school the playground is also an important site for this activity However in the literacy classroom some children encounter a discontinuity between their experiences of narrative at home and those that are valued in school Through film children develop understandings of the common characteristics of narrative and the particular language of film This book demonstrates the ways in which children are able to express and develop distinct and complex understandings of narrative that is to say where they can draw on their own experiences including those in a moving image form Children whose primary experiences of narrative are moving images face particular challenges when their experiences are not given opportunities for expression in the classroom and this has urgent implications for the teaching of literacy

the volume poses three questions What do these hitherto unseen sources reveal about the games songs and rhymes the Opies and others collected in the mid twentieth century What has happened to these vernacular forms How are the forms of vernacular play that are transmitted in playgrounds homes and streets transfigured in the new media age In addressing these questions the contributors reflect on the changing face of childhood in the twenty first century in relation to questions of gender and power and with attention to the children s own participation in producing the ethnographic record of their lives
