Textbook of Palliative Care for Children Richard Hain, Ann Goldman, Adam Rapoport, Michelle Meiring, 2021-07-27 The importance of palliative care for children facing life threatening illness and their families is now widely acknowledged as an essential part of care which should be available to all children and families throughout the child's illness and at the end of life. The new edition of the Oxford Textbook of Palliative Care for Children brings together the most up to date information, current knowledge, evidence and developments of clinical practice in the field. The book is structured into four sections: Foundations of Care describes core issues, the foundations on which paediatric palliative care is based; Child and Family Care looks at different aspects of psychological, social and cultural care for the sick child or young person and their family. These chapters cover the time course of the illness, around the time of death and support for the bereaved family; Symptom Care focuses on the uses of medication, specific symptoms and their management. Finally, Delivery of Care examines practical approaches to care in different environments and the needs of clinicians. Two new editors join the team from Canada and South Africa, reflecting our aims to contribute towards the development of care for children across the world and to be a resource for both experienced clinicians and those new to the field. Comprehensive in scope, exhaustive in detail and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data and the evolving models that support the delivery of palliative medicine to children. This includes two new chapters looking in detail at Decision Making and Perinatal Care and a new section highlighting the emerging importance of Palliative Care for Children in Humanitarian Crises. This book is an essential resource for anyone who works with children worldwide.

Oxford Textbook of Palliative Medicine Derek Doyle, 2004-01 This new edition includes 66 completely new chapters and has more emphasis on non-malignant disease and complementary therapies. The authoritative contributions come from over 150 renowned experts. [Oxford handbook of palliative care](#) Margaret Watson, 2005 [Oxford Textbook of Public Health Palliative Care](#) Julian Abel, Allan Kellehear, 2022-03-31 Death, dying, loss and care giving are not just medical issues but societal ones. Palliative care has become increasingly professionalised, focused around symptom science. With this emphasis on minimizing the harms of physical, psychological and spiritual stress, there has been a loss of how cultures and communities look after their dying, with the wider social experience of death often sidelined in the professionalisation and medicalisation of care. However, the people we know and love in the places we know and love make up what matters most for those undergoing the experiences of death, loss and care giving. Over the last 25 years, the theory, practice, research, evidence base and clinical applications have developed, generating widespread adoption of the principles of public health approaches to palliative care. The essential principles of prevention, harm reduction, early intervention and health and wellbeing promotion can be applied to the universal experience of end of life, irrespective of disease or diagnosis. Compassionate communities have become a routine part of the strategy and service development in palliative care, both within the UK and internationally. The Oxford Textbook of Public Health Palliative Care provides a reframing of palliative care, bringing together the full scope of

theory practice and evidence into one volume Written by international leaders in the field it provides the first truly comprehensive and authoritative textbook on the subject that will help to further inform developments in this growing specialty
