Reimers, 2021-09-14 This open access edited volume is a comparative effort to discern the short term educational impact of the covid 19 pandemic on students teachers and systems in Brazil Chile Finland Japan Mexico Norway Portugal Russia Singapore Spain South Africa the United Kingdom and the United States One of the first academic comparative studies of the educational impact of the pandemic the book explains how the interruption of in person instruction and the variable efficacy of alternative forms of education caused learning loss and disengagement with learning especially for disadvantaged students Other direct and indirect impacts of the pandemic diminished the ability of families to support children and youth in their education For students as well as for teachers and school staff these included the economic shocks experienced by families in some cases leading to food insecurity and in many more causing stress and anxiety and impacting mental health Opportunity to learn

was also diminished by the shocks and trauma experienced by those with a close relative infected by the virus and by the constraints on learning resulting from students having to learn at home where the demands of schoolwork had to be negotiated with other family necessities often sharing limited space Furthermore the prolonged stress caused by the uncertainty over the resolution of the pandemic and resulting from the knowledge that anyone could be infected and potentially lose their lives created a traumatic context for many that undermined the necessary focus and dedication to schoolwork These individual effects were reinforced by community effects particularly for students and teachers living in communities where the multifaceted negative impacts resulting from the pandemic were pervasive This is an open access book

Stagnancy Issues and Change Initiatives for Global Education in the Digital Age Neimann, Theresa, Felix, Jonathan J., Reeves, Stacy, Shliakhovchuk, Elena, 2020-09-04 At this juncture in the history and development of education in the digital age constituents of education systems across the globe are challenged with revising or rediscovering the purpose of educational institutions within societies Institutions need to retool to include digital games based and problem based learning and education itself must adapt to serve the needs of a diverse student population Stagnancy Issues and Change Initiatives for Global Education in the Digital Age is a cutting edge research publication that explores the complex discourse of trends shifts and changes happening in the field of education and to understand the implications for teaching learning and professional development The book helps educators understand how to make their pedagogy and andragogy relevant in the framework of constant technological shifts and changes in order to help students thrive in a global economy Featuring a wide range of topics such as gamification pedagogy and intercultural learning this book is ideal for curriculum designers academicians education professionals researchers policymakers and students Becoming a teacher Josef de Beer, 2020-12-31 This book disseminates original research on learning in and from practice in pre service teacher education Authors such as Lederman and Lederman describe the student teaching practicum or work integrated learning WIL which is an essential component of pre service teacher education as the elephant in the room These authors note that the capstone

experience in any teacher education programme is the student teaching practicum after all this is where the rubber hits the road. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the gap that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4, researchers of the University of Johannesburg disseminate their findings on establishing a teaching school based on Finnish insights in Johannesburg. Chapter 3 highlights the challenges faced in open and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely where safe spaces or laboratories are created for student teachers to learn and grow professionally. These could either be simulations such as software programmes and avatars in the intervention described in Chapter 2, student excursions as the findings in chapters 5, 7, and 10 portray, or alternative approaches to WIL, e.g. Chapters 11 and 12. The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.
