

3-Year-Old Child Observation Report Sample: Physical And Cognitive Development

Introduction

Physical and cognitive development of a 3-year-old male named Christian has been evaluated by the completion of several exercises, which were video recorded. A therapist directed these activities, which also included his six-year-old sister, Clara. Christian spends two days a week at kindergarten and the rest at home with his parents and sister, when she is not at school. He is more interested in active play such as riding a balance bike (no pedals) and skateboard of which he has reasonable command, rather than performing sedentary activities like drawing. This assignment focuses on gross motor, fine motor, language and communication, cognitive and psychosocial area milestones and whether or not Christian has achieved them. Christian is observed in a classroom where multiple activities are offered such as drawing, playing with toys and various physical events like hopping and catching a ball. Information is also sourced from his parents. His development will be compared to what is expected of a three-year-old (Queensland Health Child Development Milestones) to establish whether the appropriate standards have been reached. Theories of lifespan development including Piaget's and Erikson's will be linked to Christian's performance.

In-Depth Analysis (Gross Motor)

Movement is a sequence of patterns of both gross and fine motor skills along with fundamental movement skills. Christian undergoes various activities which involve

Design of the National Children's Study Institute of Medicine, National Research Council, Board on Children, Youth, and Families, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, 2013-08-27 The Children's Health Act mandated the National Children's Study NCS in 2000 with one of its purposes being to authorize the National Institute of Child Health and Human Development NICHD to study the environmental influences including physical chemical biological and psychosocial on children's health and development The NCS examines all aspects of the environment including air water diet noise family dynamics and genetics on the growth development and health of children across the United States for a period of 21 years The purpose of NCS is to improve the health and well being of children and to contribute to understanding the role of these factors on health and disease The research plan for the NCS was developed from 2005 to 2007 in collaboration among the Interagency Coordinating Committee the NCS Advisory Committee the NCS Program Office Westat the Vanguard Center principal investigators and federal scientists The current design of the study however uses a separate pilot to assess quality of scientific output logistics and operations and a Main Study to examine exposure outcome relationships The NCS proposed the use of a multilayered cohort approach for the Main Study which was one of the topics for discussion at the workshop that is the subject of this publication In the fall of 2012 NICHD requested that the Committee on National Statistics CNSTAT of the NRC and the IOM convene a joint workshop to be led by CNSTAT The workshop was to focus on issues related to the overall design including the framework for implementation of the NCS The committee was provided a background paper which it used to select the challenges that were discussed at the workshop Design of the National Children's Study A Workshop Summary presents an overview of the workshop held on January 11 2013 The publication includes summaries of the four sessions of the workshop a list of participants and the agenda *Twenty-five Years of Child Study* Karl S. Bernhardt, Margaret I. Fletcher, Frances L. Johnson, Dorothy A. Millichamp, Mary L. Northway, Institute of Child Study, 1951-12-15 This is the story of the Institute of Child Study University of Toronto from its beginning in 1926 to the present To honour the Director W E Blatz it has been written by members of the staff and its publication financed by parents of children who have attended the Nursery School and by students graduates and friends of the Institute The book is centred around the research programme which the Institute has conducted during the quarter century It contains abstracts of all its scientific papers and publications and reviews these to indicate the significant trends The stories of the Institute's foundation of its programmes of parent education and nursery school procedures form a setting from which the research has emerged and to which its discoveries have contributed Thus research is described as no abstract pursuit but as an activity arising out of social need and reflecting its achievements to the social good The book will of course be of interest to everyone to who knows the Institute or its Director It will be of value we believe also to all teachers and students in child study centres they will find it a handbook of research papers in this field To those in the social sciences

it will serve as an illustration of the growth and organization of an Institution peculiar to the twentieth century and specific in its formulated purposes Although the book has been created to pay tribute to the Director and to mark the event of the Institute s twenty fifth year it is in no way an eulogy extolling past achievements Rather as the Preface states we have attempted to be as honest in this volume as we have insisted we should be in our scientific researches We have tried indeed to tell the truth Truth is such a rare thing it is delightful to tell it We have expected the authors of each chapter to give an accurate picture of the topic as they evaluate it we believe it is through the unique slants of the individual writers we attain a true vision of the whole Nothing is here but that which we believe the significance of the project has been in the fulfilling rather than the fulfillment The activities of the past provide us with hope for the future This attempt to solidify our previous efforts has led us to re affirm our belief that to increase human understanding is the most satisfying of all possible enterprises

The National Children's Study Research Plan National Research Council, Institute of Medicine, Board on Population Health and Public Health Practice, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on National Statistics, Panel to Review the National Children's Study Research Plan, 2008-07-16 The National Children s Study NCS is planned to be the largest long term study of environmental and genetic effects on children s health ever conducted in the United States It proposes to examine the effects of environmental influences on the health and development of approximately 100 000 children across the United States following them from before birth until age 21 By archiving all of the data collected the NCS is intended to provide a valuable resource for analyses conducted many years into the future This book evaluates the research plan for the NCS by assessing the scientific rigor of the study and the extent to which it is being carried out with methods measures and collection of data and specimens to maximize the scientific yield of the study The book concludes that if the NCS is conducted as proposed the database derived from the study should be valuable for investigating hypotheses described in the research plan as well as additional hypotheses that will evolve Nevertheless there are important weaknesses and shortcomings in the research plan that diminish the study s expected value below what it might be

The SAGE Handbook of Child Research Gary B Melton, Asher Ben-Arieh, Judith Cashmore, Gail S. Goodman, Natalie K. Worley, 2013-12-18 It is refreshing to see a book such as this which is both broad in its conceptualization of the field of child research and deep in its focus The volume s editors are paragons of awareness when it comes to the need for interdisciplinary research and theory to illuminate the lives and experience of children James Garbarino Loyola University Chicago Covers a satisfying and unprecedentedly wide range of research relating to childhood The contributors include many eminent international scholars of childhood making the book a valuable resource for child researchers Child advocates will also find the book to be invaluable in their efforts to improve children s well being and to change policies and practices for the better Anne Smith University of Otago A really scintillating collection that will provide a lasting perspective on child studies stimulating and comprehensive Jonathan Bradshaw

University of York In keeping with global changes in children's social and legal status this Handbook includes examination of children as family members friends learners consumers people of faith and participants in law and politics The contributors also discuss the methodological and ethical requirements for research that occurs in natural settings and that enables children themselves to describe their perspective The book is divided into three parts Part I Setting Specific Issues in Child Research Part II Population Specific Issues in Child Research Part III Methods in Research on Children and Childhood
