technological advances to attain a degree of operational responsiveness not possible with yesterday's business process platform. Today companies of all types want faster and better insight into their operations. This growing demand for operational intelligence has given rise to a new smarter variety of business process management suites (BPMSs). An intelligent BPM suite provides the functionality needed to support more intelligent business operations including real time analytics, extensive complex event processing (CEP) and business activity monitoring (BAM) technologies and enhanced mobile social and collaborative capabilities. Dubbed iBPMS by Gartner Group who describes the intelligent BPM Suite as having 10 core components: A process orchestration engine, A model driven composition environment, Content interaction management, Human interaction management, Connectivity, Active analytics (sometimes called continuous intelligence), On demand analytics, Business rules management (BRM), Management and administration for the suite's technical aspects, A process component registry repository. An intelligent BPM suite provides the functionality needed to support more intelligent business operations including real time analytics, extensive complex event processing (CEP) and business activity monitoring (BAM) technologies and enhanced mobile social and collaborative capabilities. The co authors of this important book describe various aspects and approaches with regard to impact and opportunity.
