Select the storage mechanism you would like to use for database creation.

☒ **File System**

Use the file system for database storage. For best database organization and performance, Oracle recommends installing database files and Oracle software on separate disks.

Specify Database file location:

☐ **Automatic Storage Management (ASM)**

Automatic Storage Management simplifies database storage administration and optimizes database layout for I/O performance.

☐ **Raw Devices**

Raw partitions can also provide the required shared storage for Real Application Clusters (RAC) databases. You will need to create one raw device for each data file, control file, and log file for the starter database and then provide a file that maps specific tablespaces, control files, and log files to raw volumes.
