The diagram shows three pendulums hanging from a horizontal bar. Below each pendulum is a graph of its displacement $y(t)$ and velocity $v(t)$ over time t from 0 to 2 seconds. The top graph is for the leftmost pendulum, the middle for the center, and the bottom for the rightmost. A dashed line connects the equilibrium position of the leftmost pendulum to the origin of its graph. The graphs show that the leftmost pendulum has the largest amplitude, the center one has a medium amplitude, and the rightmost one has the smallest amplitude. The velocity graphs are phase-shifted by $\pi/2$ relative to the displacement graphs.
