Nahum,John W. Melvin,2013-03-09 Writing on accidental injury often seems to occur from one of two perspectives One perspective is that of those involved in aspects of injury diagnosis and treatment and the other is that of those in the engineering and biologic sciences who discuss mechanical principles and simulations From our point of view significant

information problems exist at the interface. Persons in the business of diagnosis and treatment do not know how to access use and evaluate theoretical information that does not have obvious practical applications. Persons on the theoretical side do not have enough real life field data with which to identify problems or to evaluate solutions. The ideal system provides a constant two way flow of data that permits continuous problem identification and course correction. This book attempts to provide a state of the art look at the applied bio mechanics of accidental injury causation and prevention. The authors are recognized authorities in their specialized fields. It is hoped that this book will stimulate more applied research in the field of accidental injury causation and prevention. Rechenmethoden in der Fahrzeugentwicklung Werner Dirschmid,2013-08-13 Die Fahrzeugindustrie geht zu den Branchen die sich in der Produktentwicklung auf Rechen und Simulationsverfahren abstützen. Ursache dafür ist da es die scharfe Konkurrenzsituation auf dem Automobilmarkt erfordert für den Kunden optimale Produkte zu entwickeln bei einem Minimum an Kosten. War in der Vergangenheit die Methode trial und error vorherrschend d.h. die Produktoptimierung erfolgte auf experimentellem Weg mittels aufwendiger Versuche so muß heute die Entwicklung des Fahrzeuges im wesentlichen abgeschlossen sein bevor die ersten Prototypen gebaut sind. Die damit durchgeführten Tests dürfen dann nur mehr der endgültigen Abnahme dienen. Eine ähnliche Situation zeigt der Flugzeugbau wenn auch infolge etwas anderer Voraussetzungen. So ist es kein Zufall da gerade diese beiden Industriezweige die stärksten Impulse zur Entwicklung von Simulationsverfahren gesetzt haben. Wie durch den Flugzeugbau z.B. der Einsatz der Finite Elemente Methode.
