

# Poultry Showmanship Steps

- 1. Carrying the Bird**  
Bird kept balanced and upright on the palm of the hand with head between the arm and body or if small against the carrier's body. The other hand rests on the bird's back.

- 2. Posing the Bird**  
Bird shown on table in alert position with tail fluffed, head and beak raised, feathers smooth, wings in normal position.

- 3. Examining Head**  
Bird raised to shoulder height with free hand used to move head. Bird turned and other side examined.

- 4. Examining Wings**  
First wing spread by grouping wing tip with free hand and pulling. Second wing examined by placing free hand across body of bird and applying pressure to last wing joint with thumb and fingers to extend wing.

- 4. Examining Undercolor**  
Finger tips used to gently pull tops of feathers "against the grain."

- 6. Showing Width of Body**  
Thumb and index finger of free hand placed across the bird's body directly behind the base of the wings to determine width and shape of the body.

- 7. Checking the Breast**  
Bird's head held downward with its back against showperson. Free hand used to measure breast bone and examine keel for straightness, breast blisters, indentations or other defects.

- 8. Measuring Depth of Abdomen**  
Vent examined and depth of abdomen measured by placing as many fingers of the free hand as possible between the tip of the keel and the pubic bones.

- 9. Measuring Width of Pubic Bones**  
As many fingers of free hand as is easily possible placed between the tips of the pubic bones.

- 10. Examining Feet and Legs**  
Bird held against showperson's body and freehand used to examine all parts. Bird swiveled to examine front of feet and legs.
