Le story mapping Jeff Patton, 2015-11-04 Une user story est une description simple et comprensible d'une fonctionnalité logicielle telle que l'utilisateur imagine l'utilisateur et telle qu'il la décrit Le mapping de ces user stories consiste à placer celles-ci dans une carte en deux dimensions avec un axe horizontal chronologique qui matérialise l'ordre dans lequel l'utilisateur va se servir des différentes fonctions et avec un axe vertical qui matérialise la priorité de ces fonctions L'une des idées fortes de cette méthode est de prôner un dialogue approfondi concret et transparent en amont entre les futurs utilisateurs et les concepteurs de logiciel sur ce qui est attendu du futur produit Le story mapping est donc une méthode de compréhension mutuelle des spécifications d'un logiciel qui vient en complément des méthodes agiles telles que Scrum Elle a été conçue par Jeff Patton et connaît un fort développement en ce moment

Thinking and Learning through Children's Literature Miriam G. Martinez, Junko Yokota, Charles Temple, 2017-04-18

Much of teachers attention these days is focused on having students read closely to ferret out the author s intended meaning and the devices used to convey that meaning But we cannot forget to guide students to have moving engagements with literature because they need to make strong personal connections to books of merit if they are to become the next generation of readers literate people with awareness of and concern for the diversity of human beings around them and in different times and places Fortunately guiding both students personal engagement with literature and their close reading to appreciate the author s message and craft are not incompatible goals This book enthusiastically and intelligently addresses both imperatives first surveying what is gained when students are immersed in literature then celebrating and explicating the main features of literature students need to understand to broaden their tastes and deepen their engagement at the same time they meet external standards then presenting a host of active methods for exploring all major genres of children s books and finally presenting suggestions for interdisciplinary teaching units grounded in literature Created by noted leaders in the fields of children s literature and literacy the book is enlivened by recurring features such as suggested reading lists issues for discussion links to technology and annotations of exemplary books User stories GOJKO ADZIC, DAVID
