If broken, the instruments can be used and sold for parts, since it also is a piece of technology, many of the parts can still be used for other purposes. The type of energy used in recycling is chemical energy being used to generate plastic recycling. Unlike art of recycled material as initial basis to make stronger. When plastic included plastic can be recycled but many end up in landfills and cause pollution. Rubber is harder to recycle, and can have negative impacts on the environment when they end up in landfills.
