Cultivating Adolescent Literacy Gregory

Berry, 2017-10-04 This book offers middle and high school teachers useful suggestions and strategies for cultivating literacy in their classrooms focusing primarily on the key skills of reading and writing. It discusses the nature of standards based education and emphasizes the power and importance of good literature in the ELA curriculum. Included are detailed approaches to reading and writing with simple strategies for teaching close reading of complex text as well as textual evidence and elaboration. A variety of sample performance tasks are included for commonly taught works of American and world literature as well as a variety of strategies to strengthen students reading and writing skills needed for success in college and the workplace. This book is a practical handbook for teachers who can easily find appropriate strategies to use in their classrooms and begin implementing them right away. It is a useful collection of tips with suggestions and instructions for implementing effective and engaging literacy strategies and performance tasks.

Wham! Teaching with Graphic Novels Across the Curriculum William G. Brozo, Gary Moorman, Carla Meyer, 2014

Graphic novels are an excellent medium to motivate today's youth to become independent learners and thinkers. This practical guide shows secondary school teachers how to incorporate graphic novels into content area instruction as a tool for meeting the needs of diverse learners and achieving the goals of the Common Core State Standards. The authors provide instructional guidelines with classroom examples that demonstrate how graphic novels can be used to expand content knowledge and literacy in science, social studies, math, and English language arts. Teachers will appreciate the book's specific suggestions for selecting graphic novels and for employing responsive practices that will build students reading, writing, speaking, listening, and media competencies. The range and complexity of graphic novels being published right now is simply amazing to me. They are part of what should be a balanced array of texts that all can read, enjoy, and learn from. In this volume, the authors point to this proliferation as well as the educative potential of graphic novels. After reading its pages, I feel others will agree with me that they have done an excellent job pointing out how graphic novel creators such as Jim Ottaviani and Larry Gonick communicate much about history, science, and mathematics while also making connections to comprehension and thinking skills that accompany both literacy and content specific learning. From the Foreword by Stergios Botzakis, assistant professor of adolescent literacy in the Theory and Practice in Teacher Education Department at The University of Tennessee Knoxville. The authors have set forth on a task I feel long is overdue: connecting the literacy potential of graphic novels to the content areas. This book is a wonderful contribution to the field of content area literacy studies. Michael D. Boatright, assistant professor, Department of English, Western Carolina University. Book Features: Advice for selecting and evaluating graphic novels. Teaching strategies for each of the four major content domains. Guidance for aligning instruction with the Common Core State Standards. A list of educational graphic novels organized by content area. Study group questions. And more. William G. Brozo is a professor of literacy in the Graduate School of Education at George Mason University in Fairfax, Virginia, and author of RTI and the

Adolescent Reader Gary Moorman is professor emeritus at Appalachian State University in Boone North Carolina Carla K Meyer is an assistant professor in the Reading Education and Special Education Department at Appalachian State University
