that cigarette smoking posed a significant health risk to the user in the early 1950s the major cigarette manufacturers began widespread promotion of filtered cigarettes to reassure smokers that regardless of whatever unhealthy constituents were in cigarette smoke filters were a scientific breakthrough Advertisements for Viceroy's health guard filter stated DENTISTS ADVISE Smoke VICEROYS The Nicotine and Tars Trapped by The Viceroy Filter CAN NEVER STAIN YOUR TEETH and Leading N Y Doctor Tells His Patients What to Smoke Filtered Cigarette Smoke Is Better For Health The Nicotine and Tars Trapped Cannot Reach Mouth Throat Or Lungs Chesterfield was Best for you low in nicotine highest in quality while L M s were Just What the Doctor Ordered Lorillard Tobacco Company stressed its science based Kent micronite filter the original micronite filter was made of asbestos and claimed it removed seven times more tar and nicotine than any other cigarette which put Kent in a class all by itself where health protection is concerned Of course we know today that not only were these claims patently false but the cigarette companies knew it In the early 1950s the Federal Trade Commission FTC challenged a variety of health claims made for cigarettes in their advertising including claims about tar and nicotine In 1955 FTC published advertising guidelines that among other things prohibited claims by cigarette manufacturers that a particular brand of cigarettes was low in tar and nicotine or lower than other brands when it had not been established by competent scientific proof that the claim was true and the difference was significant Cigarette manufactures however continued to advertise tar numbers In the absence of a standardized test methodology this resulted in what is referred to as a tar derby a multitude of inconsistent noncomparable claims that did not give consumers a meaningful opportunity to assess the relative tar delivery of competing brands The tar derby ended in 1960 when discussions with FTC culminated in an industry agreement to refrain from tar and nicotine advertising In 1966 however the U S Public Health Service PHS prepared a technical report on tar and nicotine that concluded The preponderance of scientific evidence strongly suggests that the lower the tar and nicotine content of cigarette smoke the less harmful would be the effect In reaching this conclusion the report noted the clear relationship between dose of cigarette smoke received by the smoker and disease risk Regardless of how dose was calculated by number of cigarettes smoked per day age of initiation total number of years one smoked or depth of inhalation mortality rates among smokers increased When smokers quit smoking their risk was reduced in proportion to the length of time off cigarettes
