**Carabid Beetles in Their Environments** H.U. Thiele,2012-12-06 With the increasing numbers of research workers and groups of investigators devoting themselves to the ecology of carabids I felt that the time had come to take stock of the existing knowledge in this field and to endeavour to weld my personal results and those of other workers into a comprehensive picture It was with these aims in mind that the following study was conceived A further goal was to attempt to show to what extent research on carabids can contribute to the larger fields of research encompassing ecology ethology and evolution In my opinion the investigations on carabids permit us to draw conclusions of general applicability and as such comparable with those made in recent years upon other groups of animals I am well aware of the risk involved nowadays in attempting on one's own to integrate results from a wide variety of scientific disciplines into a meaningful whole and for this reason I am always grateful for corrections and for additional information It is impossible for me to mention by name all of the colleagues who have given me their support in the preparation of the book Reprints of their publications have been placed at my disposal by almost all of the authors cited as well as by others whose names and works have been omitted merely in order to prevent the book from taking on encyclopedic proportions I am nevertheless indebted to them all for their cooperation
