Distribution David F. Ross, 2012-12-06 It has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events It is not that the facts of history have changed No one will dispute that the battle of Waterloo occurred on June 11 1815 or that the allied invasion of Europe began on June 6 1944 What each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the factual social intellectual and cultural milieu of their own generation By examining the facts of history from a new perspective today s historians hope to reveal some new truth that will not only illuminate the course of history but also validate contemporary values and societal ideals Although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns inventory replenishment and income statements the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today s organizational cultural and economic realities Hopefully the result will be a new synthesis where a whole new perspective will break forth exposing new directions and opportunities

Distribution Planning and Control David F. Ross, 2011-06-27 When work began on the first volume of this text in 1992 the science of distribution management was still very much a backwater of general management and academic thought While most of the body of knowledge associated with calculating EOQs fair shares inventory deployment productivity curves and other operations management techniques had long been solidly established new thinking about distribution management had taken a definite back seat to the then dominant interest in Lean thinking quality management and business process reengineering and their impact on manufacturing and service organizations For the most part discussion relating to the distribution function centered on a fairly recent concept called Logistics Management But despite talk of how logistics could be used to integrate internal and external business functions and even be considered a source of competitive advantage on its own most of the focus remained on how companies could utilize operations management techniques to optimize the traditional day to day shipping and receiving functions in order to achieve cost containment and customer fulfillment objectives In the end distribution management was for the most part still considered a dreary science concerned

with of transportation rates and cost trade offs expediting and the tedious calculus Today the science of distribution has become perhaps one of the most important and exciting disciplines in the management of business

The Little Book of Service Management Harry Katzan Jr.,2022-03-09 Service is the up and coming discipline for the 22nd century But exactly what is service Many people think that service is what people do no more no less Nothing can be farther from the truth Then if so why is the service community in constant disarray Startup businesses fail on a regular basis Why They simply do not provide good service Many persons in responsible positions rarely give service even a brief notice What they subconsciously think about service has to be the truth How often do you hear exclamations like I ll never fly again especially on that airline What about I ve had it with fast food restaurants Have you ever heard a student say I ll never take another course from that professor Or it s a great car

but the service stinks What about He may be a great doctor but he treats all patients like they are not human So what do you do if you own or manage a small business and want to start off right That's an easy question You simply send new employees or even experienced ones to service school You've heard of computer school but have you heard of service school There are books on computer for example all over the place But you probably have never seen one a book that is about service Is an automobile dealership the same as a pharmacy At the service level you can bet they are This book will tell you all you need to know about providing great service Have you ever heard of a 2 hour seminar on how to give good service I bet you haven't Sometimes a manager will give suggestions but that is about it This book is a service resource Have you experienced a doctor's office that calls a patient concerning what time his or her appointment is Have you had a car dealer tell you they have lost your car Has a doctor operated on the wrong leg Maybe even the wrong person A service is a client provider interaction that creates and captures value for both participants We use service in several aspects of our lives including business government education health care and religion But what exactly are the best practices principles and theories of service The actual study of service is a relatively new field but it is one that can open the door to a better understanding of the essential part of our lives In this little book Harry Katzan Jr founder and editor of the Journal of Service Science offers a concise readable examination of how managers can use information about services to construct a better customer environment Harry Katzan Jr believes that the characteristics of a service process determine its efficacy in solving real world problems He disseminates these characteristics and provides a clear view of service to help managers pinpoint the exact issues they need to tackle With a comprehensive bibliography examples and a highly engaging writing style this little book on service provides is perfect for the professional and laymen alike Discover how you can put information about service to work for you Hospitality and Service Harry Katzan Jr.,2020-12-28 This book is a continuation of the study of service for beginning students of the subject and for persons that just want to know what it is It is easy reading suitable for a travel read or a beach read It could serve as a source book for a person writing a bachelor's thesis It could be useful for a manager whose service employees are not performing up to par Millions of dollars are wasted every year by businesses even though they are first rate their hospitality people act like unruly rascals How do you start a service business I wouldn't like to start one or bring one back after the misery of the pandemic world we have experienced in the past few years What about the next few years Politicians are constantly under fire because they are perceived to be concerned with their own well being instead of their constituency What kind of service is the media providing when they produce fiction rather than fact Look at advertising and professional sports Do you believe any of that stuff they produce in the way of news This book is for the youngster who asks what his mother or father does all day Do they just push people around or do they help people achieve their true worth to the business or organization they represent What about the car dealer that is constantly scrambling around for new business What about some of the new stuff in business technology Do we even know what we don't know This book is for all of the above I

sincerely hope the book is a service to you The Author December 17 2020
