

"Poor living conditions were the greatest challenge faced by migrants in Britain in the period 1700-present." How far do you agree? Explain your answer (15 marks)

I disagree with the statement that poor living conditions were the greatest challenge faced by migrants in Britain in the period 1700-present, since they also faced prejudice and job-exploitation, which were more challenging.

Prejudice was arguably the greatest challenge faced by migrants as it made it hard for them to fit into British society, affecting their well-being and sense of belonging. One example of this would be the Jews. Although many anti-semitic laws were lifted at that period, they still faced anti-semitic hostility and attacks due to their cultural differences. Jews were seen as different, especially as most of them spoke Yiddish, which created a language barrier between them and the non-Jewish population. Their difference in religion and clothing made them seen as outsiders. As a result, they were used as scapegoats for the Jack the Ripper murders in the East End of London, suggesting that they struggled to win the acceptance of the English. In addition, Irish migrants also faced racism due to their difference in religion and political views. In cartoons, newspaper articles, speeches by politicians and popular jokes, Irish people were portrayed as savage, violent, drunken and animal-like. Anti-Irish racism was widespread and nasty. There were sometimes anti-Irish and anti-Catholic riots and sometimes violence between Irish Catholics and Protestants, for example in the 1840s and 1850s in Cardiff, Greenock, Stockport and towns in north-west England. This created a huge divide between the Irish and the English, making their hard life even worse. Therefore, prejudice was the greatest challenge faced by the migrants, making it difficult for them to settle in this hostile environment.

Job exploitation and the poor working conditions were also a significant challenge faced by the migrants, as they worked for long hours only for low wages. In Whitechapel, many Jewish migrants had to work in illegal sweatshops despite efforts from trade unions to make conditions better. Their low wages and the terrible working conditions led to resentment amongst the community, which was fuelled by the fact that police in the East of London could not shut the sweatshops down due to the lack of communication. The low wages and the lack of job opportunities also led to rising poverty and unemployment, which were further exacerbated by the arrival of thousands of Jews, making the situation tense. Similarly, many Irish migrants who worked as labourers in the docks had low wages. Many were so poor that they turned to begging, showing how job exploitation posed a significant challenge to migrants.

However, one could argue that poor living conditions posed the greatest challenge for migrants. Many Irish migrants lived in run-down back-to-back tenements, facing issues of overcrowding with as many as 60 people sharing a single toilet. Inadequate drainage and sewage systems were common, leading to the easy spread of diseases like cholera and typhus. Similarly, Jewish migrants in

**The Magic of Concepts** Rebecca E. Karl, 2017-03-02 In *The Magic of Concepts* Rebecca E. Karl interrogates the economic concept and practice as it was construed historically in China in the 1930s and again in the 1980s and 1990s. Separated by the Chinese Revolution and Mao's socialist experiments, each era witnessed urgent discussions about how to think about economic concepts derived from capitalism in modern China. Both eras were highly

cosmopolitan and each faced its own global crisis in economic and historical philosophy in the 1930s capitalism's failures suggested that socialism offered a plausible solution while the abandonment of socialism five decades later provoked a rethinking of the relationship between history and the economic as social practice Interweaving a critical historiography of modern China with the work of the Marxist trained economist Wang Yanan Karl shows how magical concepts based on dehistoricized Eurocentric and capitalist conceptions of historical activity that purport to exist outside lived experiences have erased much of the critical import of China's twentieth century history In this volume Karl retrieves the economic to argue for a more nuanced and critical account of twentieth century Chinese and global historical practice **Between History**

Hagener, Yvonne Zimmermann, 2025-10-01 This book is specifically dedicated to film history's own history It provides insights into the fabrication of film histories and the discourses on their materials and methods in the past in order to better understand and reconsider film history today The interventions unpack unspoken assumptions and hidden agendas that determine film historiography until today also with the aim to act as a critical reflection on the potential future orientation of the field The edited volume proposes a transnational entangled and culturally diverse approach towards an archaeology of film history while paying specific attention to persons objects infrastructures regions institutional fields and events hitherto overlooked It explores past and ongoing processes of doing undoing and redoing film history Thereby in a self reflective gesture it also draws attention to our own work as film historians Ghosts of the Somme Jonathan Evershed, 2018-05-30

Once assumed to be a driver or even cause of conflict commemoration during Ireland's Decade of Centenaries came to occupy a central place in peacebuilding efforts The inclusive and cross communal reorientation of commemoration particularly of the First World War has been widely heralded as signifying new forms of reconciliation and a greater maturity in relationships between Ireland and the UK and between Unionists and Nationalists in Northern Ireland In this study Jonathan Evershed interrogates the particular and implicitly political claims about the nature of history memory and commemoration that define and sustain these assertions and explores some of the hidden and countervailing transcripts that underwrite and disrupt them Drawing on two years of ethnographic fieldwork conducted in Belfast Evershed explores Ulster Loyalist commemoration of the Battle of the Somme its conflicted politics and its confrontation with official commemorative discourse and practice during the Decade of Centenaries He investigates how and why the myriad social political cultural and economic changes that have defined postconflict Northern Ireland have been experienced by Loyalists as a culture war and how commemoration is the means by which they confront and challenge the perceived erosion of their identity He reveals the ways in which this brings Loyalists into conflict not only with the politics of Irish Nationalism but with the peacebuilding

state and crucially with each other He demonstrates how commemoration works to reproduce the intracommunal conflicts that it claims to have overcome and interrogates its nuanced and perhaps counterintuitive function in conflict transformation

Choosing War Douglas Carl Peifer, 2016-06-08 Throughout US history presidents have had vastly different reactions to naval incidents Though some incidents have been resolved diplomatically others have escalated to outright war What factors influence the outcome of a naval incident especially when calls for retribution mingle with recommendations for restraint Given the rise of long range anti ship and anti air missile systems coupled with tensions in East Asia the Persian Gulf and the Black and Baltic Seas the question is more relevant than ever for US naval diplomacy In Choosing War Douglas Carl Peifer compares the ways in which different presidential administrations have responded when American lives were lost at sea He examines in depth three cases the Maine incident 1898 which led to war in the short term the Lusitania crisis 1915 which set the trajectory for intervention and the Panay incident 1937 which was settled diplomatically While evaluating Presidents William McKinley Woodrow Wilson and Franklin Delano Roosevelt s responses to these incidents Peifer lucidly reflects on the options they had available and the policies they ultimately selected The case studies illuminate how leadership memory and shifting domestic policy shape presidential decisions providing significant insights into the connections between naval incidents war and their historical contexts Rich in dramatic narrative and historical perspective Choosing War offers an essential tool for confronting future naval crises

Money, Inflation and Business Cycles Arkadiusz Sieroń, 2019-02-04 Who would disagree that money matters Economists have yet to sufficiently explore issues related to monetary inflation in relation to the Cantillon effect i e distribution and price effects resulting from uneven changes in the money supply and their impact on the economy This book fills this important gap in the existing literature The author classifies the various channels through which new money can be injected into the economy and demonstrates that it is not only the increase in money supply that is important but also the way in which it occurs Since the increase in money supply does not affect the cash balance of all economic entities in the same proportion and at the same time new money is introduced into the economy through specific channels a distribution of income and changes in the structure of relative prices and production occur The study of money supply growth carried out in the spirit of Richard Cantillon offers an important analytical framework that facilitates the development of a number of sub disciplines within economics and provides a better understanding of many economic processes It significantly explores the theory of money and inflation the business cycle and price bubbles but also the theory of banking and central banking income

distribution income and wealth inequalities and the theory of public choice This book is therefore an important voice in the fundamental debate on the role of monetary factors in the economy as well as on the effects and legitimacy of a loose monetary policy In 2017 the doctoral dissertation on which the book is based was awarded the Polish Prime Minister's prize In these times of non standard monetary policy and rising income inequalities in OECD countries the focus on the distribution effect of monetary inflation makes this a must read for researchers and policy makers and for anyone working in monetary economics This title was translated from Polish by Martin Turnau **Modernity and the Museum in the Arabian**

**An Extraordinary Scandal** Emma Crewe, Andrew Walker, 2020-03-15 A parliamentary scandal that dominates the headlines The resignation of major party figures Commentators and citizens wondering if the British government and the people's faith in it will survive Before Brexit another major crisis rocked the foundation of government in the country the expenses scandal of 2009 Featuring interviews with the members of parliament journalists and officials close to the center of the turmoil An Extraordinary Scandal tells the story of what really happened Andrew Walker the tax expert who oversaw the parliamentary expenses system and Emma Crewe a social scientist specializing in the institutions of parliament bring fascinating perspectives from both inside and outside parliament to this account Far from attempting to provide a defense of any of the parties involved An Extraordinary Scandal explains how the parliament fell out of step with the electorate and became a victim of its own remote institutional logic growing to become at odds with an increasingly open meritocratic society Charting the crisis from its 1990s origins when Westminster began too slowly to respond to wider societal changes to its aftermath in 2010 the authors examine how the scandal aggravated the developing crisis of trust between the British electorate and Westminster politicians that continues to this day Their in-depth research reveals new insight into how the expenses scandal acted as a glimpse of what was to come and they reveal where the scandal's legacy can be traced in the new age of mistrust and outrage in which politicians are often unfairly vulnerable to being charged in the court of public opinion by those they represent

**The Qualified Self** Lee Humphreys, 2018-04-13 How sharing the mundane details of daily life did not start with Facebook Twitter and YouTube but with pocket diaries photo albums and baby books Social critiques argue that social media have made us narcissistic that Facebook Twitter Instagram and YouTube are all vehicles for self-promotion In The Qualified Self Lee Humphreys offers a different view She shows that sharing the mundane details of our lives what we ate for lunch where we went on vacation who dropped in for a visit didn't begin with mobile devices and social media People have used media to catalog and share their lives for several centuries Pocket diaries photo albums and baby books are the predigital precursors of today's digital and mobile platforms for posting text and images The ability to take selfies has not turned us into needy narcissists it's part of a longer story about how people account for everyday life Humphreys refers to diaries in which eighteenth-century daily life is documented with the brevity and precision of a tweet and cites a nineteenth-century travel diary in which a young woman complains that her breakfast didn't agree with her Diaries Humphreys explains were often written to be shared with family

and friends Pocket diaries were as mobile as smartphones allowing the diarist to record life in real time Humphreys calls this chronicling in both digital and nondigital forms media accounting The sense of self that emerges from media accounting is not the purely statistics driven quantified self but the more well rounded qualified self We come to understand ourselves in a new way through the representations of ourselves that we create to be consumed

### **A History of Victims of Crime**

Stephen Strauss-Walsh,2023-05-19 This book examines the evolution of the contemporary crime victim s procedural place within modern Western societies Taking the history of the Irish crime victim as a case study the work charts the place of victims within criminal justice over time This evolves from the expansive latitude that they had during the eighteenth century to their major relegation to witness and informer in the nineteenth and back to a more contemporary recapturing of some of their previous centrality The book also studies what this has meant for the position of suspects and offenders as well as the population more generally Therefore some analysis is devoted to examining its impact on an offender s right to fair trial and social forms It is held that the modern crime victim has transcended its position of marginality This happened not only in law but as the consequence of the victim s new role as a key sociopolitical stakeholder This work flags the importance of victim rights conferrals and the social transformations that engendered such trends In this way victim re emergence is evidenced as being not just a legal change but a consequence of several more recent sociocultural transformations in our societies The book will be of interest to researchers academics and policy makers in criminal law human rights law criminology and legal history

*Africa* Assistant Professor Morten Jerven,2015-06-11 A valuable corrective to the fraying narrative of African failure Foreign Affairs Not so long ago Africa was being described as the hopeless continent Recently though talk has turned to Africa rising with enthusiastic voices exclaiming the potential for economic growth across many of its countries What then is the truth behind Africa s growth or lack of it In this provocative book Morten Jerven fundamentally reframes the debate challenging mainstream accounts of African economic history Whilst for the past two decades experts have focused on explaining why there has been a chronic failure of growth in Africa Jerven shows that most African economies have been growing at a rapid pace since the mid nineties In addition African economies grew rapidly in the fifties the sixties and even into the seventies Thus African states were dismissed as incapable of development based largely on observations made during the 1980s and early 1990s The result has been misguided analysis and few practical lessons learned This is an essential account of the real impact economic growth has had on Africa and what it means for the continent s future
