The Americans McDougal-Littell Publishing Staff, 2002-03-04 **The Bloomsbury Reader in Religion and Childhood** Anna Strhan, Stephen G. Parker, Susan Ridgely, 2017-01-26 From recent sex abuse scandals in the Roman Catholic Church to arguments about faith schools and religious indoctrination this volume considers the interconnection between the actual lives of children and the position of children as placeholders for the future Childhood has often been a particular site of struggle for negotiating the location of religion in public and everyday social life and children's involvement and non involvement in religion raises strong feelings because they represent the future of religious and secular communities even of society itself The Bloomsbury Reader in Religion and Childhood provides a rich resource for students and scholars of this interdisciplinary field and addresses wider questions about the distinctiveness of childhood and its religious dimensions in historical and contemporary perspective Divided into five thematic parts the volume provides classic contemporary and specially commissioned readings from a range of perspectives including the sociological anthropological historical and theological Case studies range from Augustine's description of childhood in Confessions the psychology of religion and childhood to religion in children's literature religious education and Qur'anic schools Religious traditions covered include Christianity Judaism Islam Hinduism and Buddhism in the UK and Europe USA Latin America and Africa An introduction situates each thematic part and each reading is contextualised by the editors Guidance on further reading and study questions are provided on the book's webpage **The P.T.A. Asian and American is constructed precisely when the two threatened to merge Yet the very incompleteness of American identity has allowed specific and contingent fusion of Asian and American at particular historical junctures From the importation of Asian labor in the mid nineteenth century the territorialization of Hawaii and the Philippines in the late nineteenth century through wars with Japan Korea and Vietnam and the Cold War with China to today s Asian Pacific Economic Cooperation group the United States in the modern age has seen its national identity as strongly attached to the Pacific As this has taken place so has the formation of a variety of Asian American identities Each contains a specific notion of America and reveals a particular conception of Asian and American Complicating the usual notion of identity politics and drawing on a wide range of writings sociological historical cultural medical anthropological geographic economic journalistic and political the author studies both how the formation of these identifications discloses the response of America to the presence of Asians and how Asian Americans themselves have inhabited these roles and resisted such categorizations inventing their own particular subjectivities as Americans
