**Modern Developments in Vacuum Electron Sources** Georg Gaertner, Wolfram Knapp, Richard G. Forbes, 2020-10-09 This book gives an overview of modern cathodes and electron emitters for vacuum tubes and vacuum electron devices in general It covers the latest developments in field emission theory as well as new methods towards improving thermionic and cold cathodes It addresses thermionic cathodes such as oxide cathodes impregnated and scandate cathodes as well as photocathodes and field emitters the latter comprising carbon nanotubes graphene and Spindt type emitter arrays Despite the rise and fall of the once dominant types of vacuum tubes such as radio valves and cathode ray tubes cathodes are continually being improved upon as new applications with increased demands arise for example in electron beam lithography high power and high frequency microwave tubes terahertz imaging and electron sources for accelerators Written by 17 experts in the field the book presents the latest developments in cathodes needed for these applications discussing the state of the art and addressing future trends

**Electronic Engineering and Information Science** Dongxing Wang, 2015-06-11 The International Conference of Electronic Engineering and Information Science 2015 ICEEIS 2015 was held on January 17 18 2015 Harbin China This proceedings volume assembles papers from various researchers engineers and educators engaged in the fields of electronic engineering and information science The papers in this proceedings

*Informatics in Control, Automation and Robotics* Honghua Tan, 2012-02-01 Session 1 includes 109 papers selected from 2011 3rd International Asia Conference on Informatics in Control Automation and Robotics CAR 2011 held on December 24 25 2011 Shenzhen China This session will act as an international forum for researchers and practitioners interested in the advances in and applications of Intelligent Control Systems It is an opportunity to present and observe the latest research results and ideas in these areas Intelligent control is a rapidly developing complex and challenging field of increasing practical importance and still greater potential Its applications have a solid core in robotics

and mechatronics but branch out into areas as diverse as process control automotive industry medical equipment renewable energy and air conditioning So this session will aim to strengthen relationships between industry research laboratories and universities All papers published in session 1 will be peer evaluated by at least two conference reviewers Acceptance will be based primarily on originality and contribution Journal of Chemical Engineering of Japan ,2005 Includes abstracts of Kagaku k gaku v 31 *Modern Electronics* ,1987 **Flexible Carbon-based Electronics** Paolo Samorì,Vincenzo Palermo,2019-02-11 This third volume in the Advanced Nanocarbon Materials series covers the topic of flexible electronics both from a materials and an applications perspective Comprehensive in its scope the monograph examines organic inorganic and composite materials with a section devoted to carbon based materials with a special focus on the generation and properties of 2D materials It also presents carbon modifications and derivatives such as carbon nanotubes graphene oxide and diamonds In terms of the topical applications covered these include but are not limited to flexible displays organic electronics transistors integrated circuits semiconductors and solar cells These offer perspectives for today s energy and healthcare challenges such as electrochemical energy storage and wearable devices Finally a section on fundamental properties and characterization approaches of flexible electronics rounds off the book Each contribution points out the importance of the structure function relationship for the target oriented fabrication of electronic devices enabling the design of complex components **Global Sources Electronics** ,2007 *Point-of-Care Technologies Enabling Next-Generation Healthcare Monitoring and Management* Sandeep Kumar Vashist,John H.T. Luong,2019-02-20 This book describes the emerging point of care POC technologies that are paving the way to the next generation healthcare monitoring and management It provides the readers with comprehensive up to date information about the emerging technologies such as smartphone based mobile healthcare technologies smart devices commercial personalized POC technologies paper based immunoassays IAs lab on a chip LOC based IAs and multiplex IAs The book also provides guided insights into the POC diabetes management software and smart applications and the statistical determination of various bioanalytical parameters Additionally the authors discuss the future trends in POC technologies and personalized and integrated healthcare solutions for chronic diseases such as diabetes stress obesity and cardiovascular disorders Each POC technology is described comprehensively and analyzed critically with its characteristic features bioanalytical principles applications advantages limitations and future trends This book would be a very useful resource and teaching aid for professionals working in the field of POC technologies in vitro diagnostics IVD mobile healthcare Big Data smart technology software smart applications biomedical engineering biosensors personalized healthcare and other disciplines
