Watkins,2008-08-22 In a culture increasingly focused on visual media students have learned not only to embrace multimedia presentations in the classroom but to expect them Such expectations are perhaps more prevalent in a field as dynamic and cross disciplinary as religious studies but the practice nevertheless poses some difficult educational issues the use of movies in academic coursework has far outpaced the scholarship on teaching religion and film What does it mean to utilize film in religious studies and what are the best ways to do it In *Teaching Religion and Film* an interdisciplinary team of scholars thinks about the theoretical and pedagogical concerns involved with the intersection of film and religion in the classroom They examine the use of film to teach specific religious traditions religious theories and perspectives on fundamental human values Some instructors already teach some version of a film and religion course and many have integrated film as an ancillary to achieving central course goals This collection of essays helps them understand the field better and draws the sharp distinction between merely watching movies in the classroom and comprehending film in an informed and critical way

interpreting submerged sites Our Blue Planet provides an entry point for all readers whether or not they are familiar with maritime and underwater archaeology or archaeology in general The book then shifts to a thematic approach with chapters exploring human interactions with the watery world both along the coasts and by ship These chapters discuss the relationships between culture technology and environment that allowed humans through time to spread across the globe Because ships were the primary means for humans to interact with large bodies of water they are the focus of several chapters on the development of shipbuilding technology the lives of sailors and the uses of ships in exploration expansion and warfare The book ends with chapters on how and why the non renewable submerged archaeological record should be managed so that both current and future generations can learn from the achievements and failures of past societies as well as on how anyone can become involved in maritime and underwater archaeology Throughout the reader benefits from the personal reflections of a number of leading figures in the field
