Ash,Alfons Söllner,David Lazar,2002-06-06 The dismissal of civil servants on racist or political grounds in April 1933 marked the beginning of a massive forced exodus of mainly Jewish scholars and scientists from Nazi Germany a phenomenon unprecedented in the modern history of academic life The essays in this volume examine whether that exodus of reason lead to significant scientific change and if so how that change should be characterised The volume challenges the focus of earlier work on the intellectual migration on losses for German science and gains for British and American science Instead the authors proceed from the

assumption that the sciences are open dynamic and historically contingent systems and explore the multiple complex interactions of biographical social and cultural circumstances with changes or lack of change in the migr s scientific thinking and research
