Finkelstein, 2008-12-15 Higher education is becoming destabilized in the face of extraordinarily rapid change The
composition of the academy's most valuable asset the faculty and the essential nature of faculty work are being transformed
Jack H Schuster and Martin J Finkelstein describe the transformation of the American faculty in the most extensive and
ambitious analysis of the American academic profession undertaken in a generation A century ago the American research
university emerged as a new organizational form animated by the professionalized discipline based scholar The research
university model persisted through two world wars and greatly varying economic conditions In recent years however a new
order has surfaced organized around a globalized knowledge based economy powerful privatization and market forces and
stunning new information technologies These developments have transformed the higher education enterprise in ways barely
imaginable in generations past At the heart of that transformation but largely invisible has been a restructuring of academic
appointments academic work and academic careers a reconfiguring widely decried but heretofore inadequately described
This volume depicts the scope and depth of the transformation combining empirical data drawn from three decades of national
higher education surveys The authors portrait at once startling and disturbing provides the context for interpreting these

developments as part of a larger structural evolution of the national higher education system They outline the stakes for the nation and the challenging work to be done Digest of Education Statistics ,2011 Contains information on a variety of subjects within the field of education statistics including the number of schools and colleges enrollments teachers graduates educational attainment finances Federal funds for education libraries international education and research and development
