Research on Physics Education E.F. Redish, M. Vicentini, 2004-08-09 Physics Education research is a young field with a strong tradition in many countries. However, it has only recently received full recognition of its specificity and relevance for the growth and improvement of the culture of Physics in contemporary Society for different levels and populations. This may be due on one side to the fact that teaching therefore education is part of the job of university researchers and it has often been implicitly assumed that the competences required for good research activity also guarantee good teaching practice. On the other side and perhaps more important is the fact that the problems to be afforded in doing research in education are complex problems that require a knowledge base not restricted to the disciplinary physics knowledge but enlarged to include cognitive science, communication science, history and philosophy. The topics discussed here look at some of the facets of the problem by considering the interplay of the development of cognitive models for learning Physics with some reflections on the Physics contents for contemporary and future society with the analysis of teaching strategies and the role of experiments, the issue of assessment and cultural aspects. Information is also given on the organizations involved in connecting various aspects of Physics Education: the International Commission on Physics Education, the European Physical Society and the European Physics Education Network. *DARPA Speech/Language Proceedings 1989*, 1989-05 **North Carolina Civil**

Trial Practice G. Nicholas Herman, 2014-09-01 North Carolina Civil Trial Practice is North Carolina's only and leading practitioner treatise on civil trial practice and procedure with application of the N.C. Rules of Evidence. There are a number of books for practitioners in North Carolina in various distinct subjects: e.g. in torts, workers compensation, real property law, family law, North Carolina corporations, North Carolina evidence, Employment Law and North Carolina Criminal Procedure. However, there is currently no civil trial practice book available in North Carolina and this work fills that gap and is designed to be used by all civil trial lawyers in North Carolina, whether plaintiff or defense oriented. North Carolina Civil Trial Practice comprehensively covers 1) the procedural and 2) substantive law of and 3) practice techniques for the trial of any North Carolina civil case from pre-trial procedure, mediation and all stages of a trial: jury selection, opening statement, direct and cross examination, the jury charge conference and closing argument. In addition, the book covers a detailed application of the North Carolina Rules of Evidence as they relate to the foregoing and to making objections and offers of proof, conducting direct and cross examinations, including impeachment and rebuttal, introducing exhibits and preserving the record for appeal. No current book in North Carolina addresses these matters. The book is thus distinct from any other North Carolina practitioner treatise and is designed 1) as the definitive resource for civil practitioners preparing for any trial, bench trial or jury trial in any civil proceeding and 2) for ready use in court when counsel needs to quickly find out how to introduce a particular matter or item of evidence at trial or otherwise how to deal with any other matter occurring at trial. In sum, North Carolina Civil Trial Practice is the standard bible for all civil trial practitioners. **Prove It! Using Textual Evidence, Levels 3-5** Melissa
