Practice Alberta Grade 6 Science Pat:

Enacting Alberta School Leaders' Professional Practice Competencies George J. Bedard, Carmen P.

Mombourquette, 2016-01-20 This book captures the lived experiences of school principals engaged in meeting the standards of practice inherent in the Professional Practice Competencies for School Leaders in Alberta. These principals tell their own stories of how they meet the competencies mandate of building relationships, establishing and living a school vision, leading a learning community, providing instructional leadership, developing leadership in others, managing the organization, and responding to the societal needs of the context within which the schools are located. In addition, as authors, we provide a theoretical framework for the competencies and situate them within scholarly research. Resources in Education, 1998

Leading Student Assessment Charles F. Webber, Judy L. Lupart, 2011-09-18 This book presents a new and refreshing look at student assessment from the perspective of leading educational theorists, researchers, and practitioners. The authors call for boundary-breaking assessment that reflects clear understandings of the purposes of assessment, a balance of assessment creativity and realism, the ability to detect solutions for assessment challenges, and the capacity to question and imagine assessment alternatives. The 14 chapters offer school and district educators, policy makers, researchers, and university teacher preparation faculty with a comprehensive current overview of the state and art of student assessment. Key questions are posed about assessment, and critical challenges are presented along with sound evidence-based solutions. Student assessment is analyzed in terms of its relationship with classroom instructional practices and large-scale testing programs. Formative and summative assessments are compared and contrasted. The role of psychological assessment in informing classroom practices is profiled along with the need for student voice in fair assessment practices. Readers will be challenged to consider the ecology of student assessment, that is, the impact of assessment in classrooms and schools through to the macro level of globalized societies. The underpinning values and assumptions of student assessment are highlighted. Finally, a rationale is offered for reconceptualizing and redefining assessment.
