Brooks,Clemson University,2004-12-29 The vision of researchers to create smart environments through the deployment of thousands of sensors each with a short range wireless communications channel and capable of detecting ambient conditions such as temperature movement sound light or the presence of certain objects is becoming a reality With the emergence of high speed networks an , Energy Research Abstracts ,1993 **Pain E-Book** Hubert van Griensven,Jenny Strong,Anita M. Unruh,2013-12-06 The highly anticipated new edition of Pain a textbook for health professionals previous subtitle a textbook for therapists has undergone a major rewrite in order to reflect the rapid developments in the field of pain management It highlights an effective and evidence based method providing the theoretical basis to help with the assessment and management of persistent pain while also discussing in depth a range of specific approaches Pain a textbook for health professionals is written emphatically from a biopsychosocial perspective In order to set the scene the introductory section

includes chapters on the patient's voice and social determinants of pain. This ensures that the deeply personal and social aspects of pain are not lost among the more technical and biological commentary. These aspects provide an overall context and are revisited in chapters on participation of life roles, work, rehabilitation and psychology. The basic science section includes key chapters on the psychology, neuroanatomy and neurophysiology of pain. This provides a basis for subsequent chapters on specific approaches such as pharmacology, physical therapy and complementary medicine. Pain in specific patient groups including children, the elderly and those with cancer are dealt with in separate chapters, as are pain problems such as complex regional pain syndrome and chronic spinal pain. Although the emphasis of the book is on long-term pain, acute pain is discussed as a possible precursor and determinant of chronicity. Patient-centred approach to care advocates listening to the patient's voice. Covers social determinants of pain. Guides the reader from pain psychology to the practical application of psychological interventions. Learning aids: chapter objectives, reflective exercises, case examples and revision questions. Emphasizes an evidence-based perspective. Written by an international team of experts. Topics such as pain in children and the elderly, pain education for professionals, disability and medico-legal aspects. Expanded focus on complex regional pain syndrome, acupuncture and psychology. Improved layout for a better learning and studying experience.
