change their behaviour when they act as members of a group or an organisation in a group we tend to develop and conform to a shared standard and when we act in organisations habits routines processes and procedures form and a culture emerges These take on a life of their own affecting the behaviour of the participants Participants can affect organisational behaviour but this takes time and effort Company law finds this phenomenon and supplies it with a structure supporting autonomous action by organisations The real entity theory advanced in this book explains company law as it stands at a positive level Legal personality overcomes the problems that organisations are social rather than brute facts and that there is no unique physical manifestation permanently associated with an organisation The corporate constitution is not a contract it is best characterised as an instrument adopted on a statutory basis through private action Shareholders cannot limit the capacity of companies or the authority of the board to bind the company in contract and companies are liable in tort and crime The statute creates roles for shareholders directors a company secretary and auditors and so facilitates a process leading to organisational action The law also integrates the interests of creditors and stakeholders
