The Aptitude Myth Cornelius N. Grove, 2013-06-19 The Aptitude Myth addresses the decline in American children's mastery of critical school subjects. It contends that a contributing cause for this decline derives from many Americans' ways of thinking about children's learning. They believe that school performance is determined very largely by innate aptitude. The Aptitude Myth traces the deep historical origins, the spread and elaboration, and the eventual triumph of the belief in the determining power of mental abilities given at birth and therefore fixed. Covered is 600 B.C.E. until 1926 when the SAT was first administered. The belief in aptitude assumed by many Americans to be the modern view of learning ability is revealed as an archaic way of thinking that originated in the imaginations of our ancient forebears and gradually gained credibility over 2500 years. In recent times the belief became elaborated to include the fanciful notion that more than modest academic study injures a child's health. Having inherited this mindset, Americans don't know how to insure that children gain mastery. A new mindset is needed. The final chapter offers a transformative mindset.

Community based research in sport, exercise and health science Robert J. Schinke, Kerry McGannon, Brett Smith, 2016-01-08 Community based research has recently gained attention within the sport and exercise sciences. When seeking to understand community based research methodologies, one finds a diversity of approaches spanning a breadth of ontological views and equally diverse methodological approaches. Though little is known about community based sport, exercise, and physical activity research, these foci are beginning to gain scholarly attention in part through the emerging sport for development and peace literature. This book features a conceptual introduction and eight pioneering examples of community based research from North American, European, and Oceanic scholars. The topic matter reveals scholarship undertaken in relation to health, physical activity, youth sport, and elite sport, exemplifying work with mainstream and marginalized populations. This book, perhaps the first compilation of community based research relating to sport, exercise, and health, will be of interest to sociologists of sport, sport and exercise psychology scholars, sport management scholars, qualitative researchers, health scholars, and practitioners, sport for development organizations, and research ready communities seeking to engage in localized research projects. This book was published as a special issue of *Qualitative Research in Sport, Exercise and Health*.

Pollinators and Pesticides Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2013-04-05 If farmers had to pollinate fruit and vegetables without the help of insects, it would cost hundreds of millions of pounds, and we would all be stung by rising food prices. Defra Ministers, however, have refused to back EU efforts to protect pollinators. Disease, habitat loss, and climate change can all affect insect populations, but a growing body of research suggests that neonicotinoids are having an especially damaging impact on pollinators. The weight of scientific evidence now warrants precautionary action, so the Committee is calling for a moratorium on pesticides linked to bee decline to be introduced by 1 January next year. An EU wide moratorium on the use of imidacloprid, clothianidin, and TMX on crops attractive to bees, following a recent risk warning from the European Food Safety

Authority has also been proposed Many of the UK s largest garden retailers have voluntarily withdrawn non professional plant protection products that contain neonicotinoids A full ban on the sale of neonicotinoids for public domestic use which could create an urban safe haven for pollinators is recommended The pesticide industry must open itself to greater academic scrutiny if it wants to justify its continued opposition to the precautionary protection of pollinators The Government s National Action Plan for the Sustainable Use of Pesticides published earlier this year was a missed opportunity according to the Committee Clearer targets are needed to reduce reliance on pesticides as far as possible And Integrated Pest Management which emphasises alternatives to pesticides but does not preclude their use should be made the central principle of the plan
