*NASA Technical Memorandum* ,1994      Chemical news and Journal of physical science ,1881      *NASA Authorization for Fiscal Year 1973* United States. Congress. Senate. Committee on Aeronautical and Space Sciences,1972      **The Chemical News and Journal of Physical Science** ,1881      **Scientists in the Classroom** J. Rudolph,2002-05-02 During the 1950s leading American scientists embarked on an unprecedented project to remake high school science education Dissatisfaction with the soft school curriculum of the time advocated by the professional education establishment and concern over the growing technological sophistication of the Soviet Union led government officials to encourage a handful of elite research scientists fresh from their World War II successes to revitalize the nations science curricula In *Scientists in the Classroom* John L Rudolph argues that the Cold War environment long neglected in the history of education literature is crucial to understanding both the reasons for the public acceptance of scientific authority in the field of education and the nature of the curriculum materials that were eventually produced Drawing on a wealth of previously untapped resources from government and university archives Rudolph focuses on the National Science Foundation supported curriculum projects initiated in 1956 What the historical record reveals according to Rudolph is that these materials were designed not just to improve American science education but to advance the professional interest of the American scientific community in the postwar period as well      **Resources in Education** ,1987      **Nuclear Science Abstracts** ,1976      **Space Agreements with the Soviet Union** United States. Congress. Senate. Parliament,1902      **Solar Energy Update** ,1980      **Scientific and Technical Aerospace Reports** ,1991 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database      Originalism, Federalism, and the American Constitutional Enterprise Edward A. Purcell,2007-12-28 In this lively historical examination of American federalism a leading scholar in the field refutes the widely accepted notion that the founding fathers carefully crafted a constitutional balance of power between the states and the federal government Edward A Purcell Jr bases his argument on close analysis of the Constitution s original structure and the ways that structure both induced and accommodated changes over the centuries There was no clear agreement among the founding fathers regarding the true nature of American federalism Purcell contends nor was there a consensus on correct lines dividing state and national authority Furthermore even had there been some true original understanding the elastic and dynamic nature of the constitutional structure would have made it impossible for subsequent generations to maintain any original or permanent balance The author traces the evolution of federalism through the centuries focusing particularly on shifting interpretations founded on political interests He concludes with insights into current issues of federal power and a discussion of the grounds

on which legitimate decisions about federal and state power should rest      *Being Nuclear* Gabrielle Hecht, 2012-03-02 The hidden history of African uranium and what it means for a state an object an industry a workplace to be nuclear Uranium from Africa has long been a major source of fuel for nuclear power and atomic weapons including the bomb dropped on Hiroshima In 2003 after the infamous yellow cake from Niger Africa suddenly became notorious as a source of uranium a component of nuclear weapons But did that admit Niger or any of Africa's other uranium producing countries to the select society of nuclear states Does uranium itself count as a nuclear thing In this book Gabrielle Hecht lucidly probes the question of what it means for something a state an object an industry a workplace to be nuclear Hecht shows that questions about being nuclear a state that she calls nuclearity lie at the heart of today's global nuclear order and the relationships between developing nations often former colonies and nuclear powers often former colonizers Hecht enters African nuclear worlds focusing on miners and the occupational hazard of radiation exposure Could a mine be a nuclear workplace if as in some South African mines its radiation levels went undetected and unmeasured With this book Hecht is the first to put Africa in the nuclear world and the nuclear world in Africa By doing so she remakes our understanding of the nuclear age      **Project Plowshare** Scott Kaufman, 2012-11-20 Inspired by President Dwight D Eisenhower's Atoms for Peace speech scientists at the Atomic Energy Commission and the University of California's Radiation Laboratory began in 1957 a program they called Plowshare Joined by like minded government officials scientists and business leaders champions of peaceful nuclear explosions maintained that they could create new elements and isotopes for general use build storage facilities for water or fuel mine ores increase oil and natural gas production generate heat for power production and construct roads harbors and canals By harnessing the power of the atom for nonmilitary purposes Plowshare backers expected to protect American security defend U S legitimacy and prestige and ensure access to energy resources Scott Kaufman's extensive research in nearly two dozen archives in three nations shows how science politics and environmentalism converged to shape the lasting conflict over the use of nuclear technology Indeed despite technological and strategic promise Plowshare's early champions soon found themselves facing a vocal and powerful coalition of federal and state officials scientists industrialists environmentalists and average citizens Skeptical politicians domestic and international pressure to stop nuclear testing and a lack of government funding severely restricted the program By the mid 1970s Plowshare was in the words of one government official dead as a doornail However the thought of using the atom for peaceful purposes remains alive      **ESSA Science and Engineering, July 31, 1965 to June 30, 1967** United States.
