new drugs Natural cyclodextrin can form supramolecular inclusion complexes with insoluble drugs thus increasing the solubility of insoluble drugs As a new drug delivery carrier it has been widely studied and applied Sulfobutyl ether cyclodextrin is a derivative of cyclodextrin Because of its good water solubility and biocompatibility sulfobutyl ether cyclodextrin can significantly increase the solubility bioavailability and low nephrotoxicity of drugs As a new type of injection drug delivery carrier it has become one of the hot spots in the research and development of new drugs at home and abroad
