 Economics is the strangest and most dubious as also frustrating animal of social sciences and humanities The debate on what  
 it is and what its strengths and weaknesses are in understanding and changing the economy and society for the better is  
 never ending This book cuts through this noise for econ undergrads with social concerns It is crafted to be stuffed with  
 peripatetic hops skips and intellectual and emotional jumps about the nature and character of the brain circuits of economics  
 in terms of its methodological political sociological anthropological historical feminist ethical ecological spiritual literary  
 technical corporate and other underpinnings Diverse stories are told as alerts or nudges for the undergrads who as aspirant  
 youth have in general hyperbolic discounting attitude towards social change The mind and heart of the undergrad reading  
 this book will hopefully be ignited so as to endeavour to find out the purpose of economic education and how economics  
 should be learnt in order to rectify the failures of our current socio economic system The seriously academic undergrad may
