## Instructor Manual

### Chapter 7

#### Supporting and Troubleshooting Windows

In this chapter, students will look under the Windows desktop at some of the complexity of the Windows operating system, including the registry, the Windows user options, power options, and various ways to start up Windows for resolving problems, as well as working with device drivers and troubleshooting. At the end of the lesson students should be able to:

LO 7.1 Define the role of the registry in Windows and back up and modify the registry when needed.

LO 7.2 Describe the Windows user options and power options, and, given a scenario, select appropriate startup options.

LO 7.3 Install and manage device drivers.

LO 7.4 Troubleshoot common Windows problems.

*Estimated time for lesson: 3 to 4 hours*

#### Preparing for Class

At minimum, the students should have computers configured with Windows 7, Windows 8.1 or Windows 10. Each student should be able to log on with an administrator type account.

#### Prerequisites for Class

Ensure that the students are:

#### General Teaching Tips

This chapter moves from the conceptual to the practical, while maintaining the "survey" level. The goal of this chapter is to give users enough understanding of the workings of Windows to enable them to use some of the simpler recovery tools, but to also understand the boundaries between recovering from a disaster and creating a disaster by attempting to do advanced tasks without the requisite knowledge. This caution especially applies to the first section, where we want the students to understand the registry and its components but not to get bold about making direct changes. It includes a Try-This (page 268) in which they open Registry Editor, and a Step-
