Neftci, 2000-05-19 A step by step explanation of the mathematical models used to price derivatives For this second edition Salih Neftci has expanded one chapter added six new ones and inserted chapter concluding exercises He does not assume that the reader has a thorough mathematical background His explanations of financial calculus seek to be simple and perceptive

The Past and Future of Information Systems: 1976 -2006 and Beyond David Avison, Steve Elliot, John Krogstie, Jan Pries-Heje, 2006-11-30 The International Federation for Information Processing IFIP is a non profit umbrella organization for national societies working in the field of information processing It was founded in 1960 under the auspices of UNESCO It is organized into several technical committees This book represents the proceedings of the 2006 conference of technical committee 8 TC8 which covers the field of information systems This conference formed part of IFIP s World Computer Congress in Chile The occasion celebrated the 30th anniversary of IFIP TC8 by looking at the past present and future of information systems The proceedings reflect not only the breadth and depth of the work of TC8 but also the international nature of the group with authors from 18 countries being represented in the 21 papers including two invited papers and 2 panels All submissions were rigorously refereed by at least two reviewers and an associate editor and following the review and resubmission process nearly 50% of submissions were accepted This paper introduces the papers and panels presented at the conference and published in this volume It is never straightforward to classify a set of papers but we have made an attempt and this classification is also reflected in the sessions of the conference itself The classification for the papers is as follows the world of information systems early pioneers developing improved information systems information systems in their domains of application the discipline of information systems issues of production IT impacts on the organization tools and modeling and new directions

Financial Innovation and Engineering in Islamic Finance Samir Alamad, 2017-04-13 This book provides two important contributions to existing theories in the financial innovation literature First it extends the existing literature of innovation orientation to a completely new field and construct that is based on a religious imperative as a framework within which financial innovation is constrained It explains how an innovation orientation in IFIs can be directed within religious rules which indicates that innovation orientation in IFIs is a learning philosophy Second the book introduces and examines the plasticity of Shariah as a shared boundary object and its dynamic role in managing tension and conflicting values in the financial innovation process Furthermore building on the empirical results the study illustrates the insights that each

theoretical lens affords into practices of collaboration and develops a novel analytical framework for understanding religious orientation towards financial innovation This practical contribution of the developed framework could form the basis for a standardised framework for the Islamic finance industry The book concludes by noting the policy and managerial implications of its findings and provides directions for further research
