The ostentatious display of luxury dress more specifically served as a means of self definition for members of the ruling elite and the courtly lovers among them In *Courtly Love Undressed* E Jane Burns unfolds the rich display of costly garments worn by amorous partners in literary texts and other cultural documents in the French High Middle Ages Burns reads through clothes in lyric romance and didactic literary works vernacular sermons and sumptuary laws to show how courtly attire is used to negotiate desire sexuality and symbolic space as well as social class Reading through clothes reveals that the expression of female desire so often effaced in courtly lyric and romance can be registered in the poetic deployment of fabric and adornment and that gender is often configured along a sartorial continuum rather than in terms of naturally derived categories of woman and man The symbolic identification of the court itself as a hybrid crossing place between Europe and the East also emerges through Burns s reading of literary allusions to the trade travel and pilgrimage that brought luxury cloth to France

The Earth Transformed Peter Frankopan,2023-04-18 A NEW YORKER BEST BOOK OF THE YEAR A revolutionary new history that reveals how climate change has dramatically shaped the development and demise of civilizations across time The ebook edition now includes endnotes Anyone who purchased the book previously can re download this updated edition and access the notes Global warming is one of the greatest dangers mankind faces

today Even as temperatures increase sea levels rise and natural disasters escalate our current environmental crisis feels difficult to predict and understand But climate change and its effects on us are not new In a bold narrative that spans centuries and continents Peter Frankopan argues that nature has always played a fundamental role in the writing of history From the fall of the Moche civilization in South America that came about because of the cyclical pressures of El Niño to volcanic eruptions in Iceland that affected Egypt and helped bring the Ottoman empire to its knees climate change and its influences have always been with us Frankopan explains how the Vikings emerged thanks to catastrophic crop failure why the roots of regime change in eleventh century Baghdad lay in the collapse of cotton prices resulting from unusual climate patterns and why the western expansion of the frontiers in North America was directly affected by solar flare activity in the eighteenth century Again and again Frankopan shows that when past empires have failed to act sustainably they have been met with catastrophe Blending brilliant historical writing and cutting edge scientific research *The Earth Transformed* will radically reframe the way we look at the world and our future
